Whether you're a student, creator, analyst, or team lead, this book shows you exactly how to install Atlas on macOS, set it up in minutes, and turn everyday browsing into automated, private, high-leverage workflows. Atlas brings ChatGPT to any page, adds optional browser memories, and introduces Agent Mode so it can take actions for you with guardrails you control. What you'll learn: step-by-step install, set up on macOS, sign in, import passwords, bookmarks, history, and tune the new tab. Ask ChatGPT experience for speed, search, less, finish, more, use on page, chat for instant summaries, clean citations, comparisons, and follow-up questions without copy-paste context juggling. Stay in control: master Incognito, the address bar, page visibility, toggle, and data controls so Atlas only sees what you allow. Learn how memories are optional, visible, archivable, and deletable. Agent Mode safely lets ChatGPT click around for you, researching, planning, and completing routine tasks while respecting built-in limits (e.g., it can't run code or install extensions and your approvals). Power workflows, research briefs, competitor scans, shopping carts, study aids, and executive summaries you can trust. For families, teams, understand parental controls and Business Enterprise basics so you can enable features responsibly. Who is this book for? Students, researchers who want faster reading, better notes, and self-tests as they learn. Professionals who live in the browser and need reliable automation for docs, data, and decisions.
