Math Makes Sense!: A Constructivist Approach To The Teaching And Learning Of Mathematics Ana Helvia Quintero, Hector Rosario, 2016-03-02 The methods for teaching mathematics usually follow the structure of mathematics The problem with this is that the structure of mathematics took centuries of elaboration to develop and is not the same as how one originally experiences mathematics Based on research of how mathematics is actually learned this book presents an innovative approach for teaching mathematics that will engage pupils and can have lifelong benefits for how they take on board more advanced mathematical topics Math Makes Sense makes use of the realistic mathematics education RME philosophy which bridges the gap between informal mathematics learning such as in day to day life and more formal teaching in school Many real life situations as examples for learning are included as well as different mathematical and logic puzzles that will stimulate learning and foster understanding The ideas presented are not confined to one national curriculum and so can be helpful worldwide to teachers instructors both in practice and those still in training private tutors homeschooling parents and educational researchers

Multiple Pathways to the Student Brain Janet Zadina, 2014-05-06 From an award winning neuroscience researcher with twenty years of teaching experience Multiple Pathways to the Student Brain uses educator friendly language to explain how the brain learns Steering clear of neuro myths Dr Janet Zadina discusses multiple brain pathways for learning and provides practical advice for creating a brain compatible classroom While there are an

abundance of books and workshops that aim to integrate education and brain science educators are seldom given concrete actionable advice that makes a difference in the classroom Multiple Pathways to the Student Brain bridges that divide by providing examples of strategies for day to day instruction aligned with the latest brain science The book explains not only the sensory motor pathways that are familiar to most educators visual auditory and kinesthetic it also explores the lesser known pathways reward survival language social emotional frontal lobe and memory attention and how they can be tapped to energize and enhance instruction Educators are forever searching for new and improved ways to convey information and inspire curiosity and research suggests that exploiting different pathways may have a major effect on learning Multiple Pathways to the Student Brain allows readers to see brain science through the eyes of a teacher and teaching through the eyes of a brain scientist
