Affirmations & Creative Visualization Brenda Nathan, 2015-09-23 How many times a day do you do something only to end up regretting it a moment or two later? How often do you struggle with negativity in your mind? If you are like most people, the answers to these two questions are many and very respectively. To make a real lasting change in your life, you need to change the patterns of your thoughts. That doesn't mean you reach inside your head and poke around. No, it's nothing that complex. Changing the patterns of your thoughts is as simple as telling yourself the right things, affirming the positivity, reminding yourself of what you want, visualizing what you want to happen in your life. Your mind is a simple thing in one way, at least it believes the images that you show to it. It reacts to those images emotionally and then seeks to manifest those images throughout your life. By working with *The Affirmations Creative Visualization Workbook*, you will set yourself up for lasting change by signaling to your mind that this is what you want it to do. This book guides you toward a daily routine of written positive affirmations and visualizations that will change your life. You'll keep a monthly log of accomplishments and review your entries periodically, getting a clear picture of just how far you have come in your journey. If you want to make a difference for yourself only, you can do it, but this workbook will help you along the way.

Drawing from the expertise, research, and experience of an international range of academics and practitioners from across the domains of Visualization, Human-Computer Interaction, and Ubiquitous Computing, the book explores the challenges of mobile visualization and explains how it differs from traditional data visualization. It highlights opportunities for reaching new audiences with engaging, interactive, and compelling mobile content. In nine chapters, this book presents interesting perspectives on mobile data visualization, including how to characterize and classify mobile visualizations, how to interact with them while on the go, and with limited attention spans, how to adapt them to various mobile contexts, specific methods on how to design and evaluate them, reflections on privacy, ethical, and other challenges, as well as an outlook to a future of ubiquitous visualization. This accessible book is a valuable and rich resource for visualization designers, practitioners, researchers, and students alike.
