**Android Apps with App Inventor** Jörg H. Kloss,2012-02-22 Wi Android Apps with App Inventor provides hands on walkthroughs that cover every area of App Inventor development including the Google and MIT versions of

App Inventor Kloss begins with the absolute basics of program structure syntax flow and function and then demonstrates simple ways to solve today's most common mobile development problems. Along the way you'll build a dozen real Android apps from games and geotrackers to navigation systems and news tickers. By the time you're done you'll be comfortable implementing advanced apps and mashups integrating realtime multimedia data from all kinds of Web services with the communication and sensor based features of your smartphone. Topics covered include: Installing and configuring App Inventor; Building modern, attractive mobile user interfaces; Controlling Android media hardware including the camera; Saving data locally with TinyDB or in the cloud with TinyWebDB; Streamlining and automating phone text and email communications; Tracking orientation, acceleration and geoposition; Integrating text to speech and speech to text in your apps; Controlling other apps and Web services with ActivityStarter; Building mobile mashups by exchanging data with Web APIs; Testing your apps for diverse hardware with the Android Emulator. Example apps including multimedia center, online vocabulary trainer, finger painting, squash game, compass, geocacher, navigator, stock market ticker and many more. This book will empower you to explore, experiment, build your skills and confidence and start writing professional quality Android apps for yourself and for everyone else. **Sign Language** Roland Pfau, Markus Steinbach, Bencie Woll, 2012-08-31. Sign language linguists show here that all questions relevant to the linguistic investigation of spoken languages can be asked about sign languages. Conversely, questions that sign language linguists consider even if spoken language researchers have not asked them yet should also be asked of spoken languages. The HSK handbook Sign Language aims to provide a concise and comprehensive overview of the state of the art in sign language linguistics. It includes 44 chapters written by leading researchers in the field that address issues in language typology, sign language grammar, psycholinguistics, neurolinguistics, sociolinguistics and language documentation and transcription. Crucially, all topics are presented in a way that makes them accessible to linguists who are not familiar with sign language linguistics.

*Explainable Artificial Intelligence for Intelligent Transportation Systems* Amina Adadi, Afaf Bouhouche, 2023-10-20. Artificial Intelligence AI and Machine Learning ML are set to revolutionize all industries and the Intelligent Transportation Systems ITS field is no exception. While ML especially deep learning models achieve great performance in terms of accuracy, the outcomes provided are not amenable to human scrutiny and can hardly be explained. This can be very problematic especially for systems of a safety critical nature such as transportation systems. Explainable AI XAI methods have been proposed to tackle this issue by producing human interpretable representations of machine learning models while maintaining performance. These methods hold the potential to increase public acceptance and trust in AI based ITS. FEATURES: Provides the necessary background for newcomers to the field both academics and interested practitioners; Presents a timely snapshot of explainable and interpretable models in ITS applications; Discusses ethical, societal and legal implications of adopting XAI in the context of ITS; Identifies future research directions and open problems.
