*The Dark Social* Toija Cinque,Alexia Maddox,Robert W. Gehl,2023-11-07 This book explores how people interact online through anonymous communication in encrypted hidden or otherwise obscured online spaces Beyond the Dark Web itself this book examines how the concept of dark social broadens the possibilities for examining notions of darkness and sociality in the age of digitality and datafied life The authors take into account technical moral ethical and pragmatic responses to ourselves and communities seeking to be belong in of the dark Scholarship on the Darknet and Dark Social Spaces tends to focus on the uses of encryption and other privacy enhancing technologies to engender resistance acts Such understandings of the dark social are naturally in tension with social and political theories which argue that for politics and acts to matter they must appear in the public light They are also in tension with popular narratives of the dark recesses of the web which are disparaged by structural powers who seek to keep their subjects knowable and locatable on the clear web The binary of dark versus light is challenged in this book The authors provocation is that practices of dark resistance motility and power are enacted by emerging data cultures This book draws together scholarship activism and creativity to push past conceptual binary positions and create new approaches to darknet and dark social studies The Dark Social Online Practices of Resistance Motility and Power will be a key resource for academics researchers and advanced students of media studies cultural studies communication studies research methods and sociology This book was originally published as a special issue of Continuum Journal of Media Cultural Studies

Brogan,Julien Stanwell Smith,2012-10-25 Anyone can write a blog post but not everyone can get it liked thirty five thousand times and not everyone can get seventy five thousand subscribers But the reason we ve done these things isn t because we re special It s because we tried and failed the same way you learn to ride a bike We tried again and again and now we have an idea how to get from point A to point B faster because of it Three short years ago when Chris Brogan and Julien Smith wrote their bestseller Trust Agents being interesting and human on the Web was enough to build a significant audience But now everybody has a platform The problem is that most of them are just making noise In *The Impact Equation* Brogan and Smith show that to make people truly care about what you have to say you need more than just a good idea trust among your audience or a certain number of followers You need a potent mix of all of the above and more Use the Impact Equation to figure out what you re doing right and wrong Apply it to a blog a tweet a video or a mainstream media advertising campaign Use it to explain why a feature in a national newspaper that reaches millions might have less impact than a blog post that reaches a thousand passionate subscribers Consider the phenomenally successful British singer Adele For most musicians onstage banter basically consists of yelling Hello Cleveland But Adele connects with her audience pausing between songs to discuss a falling out with her friends or the drama of a break up Each of these moments comes off as if she were talking directly with you and you can easily relate Adele has Impact As the traditional channels for marketing selling and influencing disappear and more people interact mainly online the very nature of attention is changing *The Impact Equation* will give you the tools and metrics that guarantee your message will be heard *The Case for Community in Online Spaces* Brooke

Dunbar-Treadwell,2023-08-01 Many believe that our sense of community is dying as the result of our digitized world In this book Brooke Dunbar Treadwell refutes this claim and presents a case that connection is thriving in online spaces as people share stories practice vulnerability and build communities From memes to Reddit to Facebook Dunbar Treadwell offers perspectives that combine relevant scholarship with examples from her research pop culture and society She addresses some of the factors that contribute to disconnection like political division and dehumanization while also painting a picture of a society that desperately desires connection and may not always know how to find it Ultimately this book illustrates how community and connection have changed over time how they are currently alive and well while offering some important

practical advice for how readers can consider their own choices in online spaces to help them find the community that they seek Scholars of communication media studies and political science will find this book of particular interest **The Hidden Psychology of Social Networks: How Brands Create Authentic Engagement by Understanding What Motivates Us**
