Parkinson's Disease and Nonmotor Dysfunction Ronald F. Pfeiffer, Ivan Bodis-Wollner, 2007-11-10 Parkinson's Disease and Nonmotor Dysfunction fills a major gap in the current rapidly growing body of knowledge concerning Parkinson's disease Drs Pfeiffer and Bodis Wollner have correctly perceived that many nonmotor features of Parkinson's disease are given insufficient attention in the medical literature Unfortunately they are often also given insufficient attention by the practicing neurologists who see these patients As recently pointed out there is clearly much more to Parkinson's disease than depletion of the nigrostriatal dopamine system 1 Parkinson's disease not just multiple system atrophy is a multisystem disorder both pathologically and in its clinical manifestations This is clearly true for the various motor system abnormalities which are not fully corrected by dopamine replacement therapy strategies but also for the nonmotor system abnormalities that are the subject of this volume Although recently there has been increased awareness of the cognitive psychiatric and sleep disorders commonly associated with Parkinson's disease many of their manifestations remain under recognized and their importance in managing patients is underestimated Even less attention is paid to the myriad of other nonmotor disturbances that plague these patients For example among the autonomic disorders although orthostatic hypotension is well recognized it is usually attributed to dopaminergic medications rather than to effects of the underlying disease Urologic disorders are also very familiar in these patients but may not be properly understood or well managed

Torture, Psychoanalysis and Human Rights Monica Luci, 2017-04-28 Torture Psychoanalysis and Human Rights contributes to the development of that field of study called psycho-social that is presently more and more committed to providing understanding of social phenomena making use of the explicative perspective of psychoanalysis The book seeks to develop a concise and integrated framework of understanding of torture as a socio-political phenomenon based on psychoanalytic thinking through which different dimensions of the subject of study become more comprehensible Monica Luci argues that torture performs a covert emotional function in society In order to identify what this function might be a profile of torturous societies and the main psychological dynamics of social actors involved torturers victims and bystanders are drawn from literature Accordingly

a wide ranging description of the phenomenology of torture is provided detecting an inclusive and recurring pattern of key elements Relying on psychoanalytic concepts derived from different theoretical traditions including British object relations theories American relational psychoanalysis and analytical psychology the study provides an advanced line of conceptual research shaping a model whose aim is to grasp the deep meaning of key intrapsychic interpersonal and group dynamics involved in torture Once a sufficiently coherent understanding has been reached Luci proposes using it as a groundwork tool in the human rights field to re think the best strategies of prevention and recovery from post torture psychological and social suffering The book initiates a dialogue between psychoanalysis and human rights showing that the proposed psychoanalytic understanding is a viable conceptualisation for expanding thinking of crucial issues regarding torture which might be relevant to human rights and legal doctrine such as the responsibility of perpetrators the reparation of victims and the question of truth Torture Psychoanalysis and Human Rights is the first book to build a psychoanalytic theory of torture from which psychological social and legal reflections as well as practical aspects of treatment can be mutually derived and understood It will appeal to psychoanalysts psychoanalytic psychotherapists and Jungians as well as scholars of politics social work and justice and human rights and postgraduate students studying across these fields **Motor Cycling and**
