Make: Volume 87 Dale Dougherty, 2023-10-31 Boards are back and more powerful than ever. With fresh offerings from Arduino and Raspberry Pi and powerhouse boards like DFRobot's LattePanda Sigma and Nvidia's Jetson Orin Nano, it's easier than ever to put epic computing power in the palm of your hand. In this issue of Make, we track new trends in microcontrollers and single board computers and show you the ones we're most excited about. And if you still can't find the right board for you, we show you how to design and manufacture your own custom chips for cheap. Next, use machine learning and Particle to automatically unmute your mic when someone says "You're muted." Then, use a Waveshare RP2040 board to build a mini oscilloscope for your workbench for about 25. Annual Boards Guide: Meet the hottest new boards and compare specs for 80 microcontrollers and single board computers in our annual comparison guide. Plus, 31 projects. Craft an illuminated animated tessellated tote bag using LED pebble lights and 3D printed fabric. Build an optical transmitter for covert communication. Sew a soft touch panel matrix for wearable electronics. Super size classic wooden Froebel blocks for a fun playground experience. Harvest disposable vape batteries and give e-waste a 2nd life. Build a metal detector circuit. 3D print a Kirby fume extractor or laser cut an emoji fortune teller. And much more.

Communicating Science to the Public

Leo Tan Wee Hin, R. Subramaniam, 2014-07-24 This book explores effective approaches for communicating science to the public in developing countries. Offering multiple perspectives on this important topic, it features 17 chapters that represent the efforts of 23 authors from eight countries: Australia, Bangladesh, India, Ireland, New Zealand, USA, Singapore, and South Africa. Inside, readers will find a diversity of approaches to communicate science to the public. The book also highlights some of the challenges that science communicators, science policy makers, science teachers, university academics in the sciences, and even entrepreneurs may face in their attempts to boost science literacy levels in their countries. In addition, it shares several best practices from the developed world that may help readers create communication initiatives that can lead to increased engagement with science in communities in the Asia Pacific region and beyond. Given the pervasive influence of science and technology in today's society, their impact will only increase in the years to come as the world becomes more globalized and the economies of countries become more inter-linked. This book will be a useful source of reference for developing countries looking to tap into the potential of science for nation building and effectively engage their communities to better understand science and technology.
