Chemical Process Design and Simulation: Aspen Plus and Aspen Hysys Applications Juma Haydary, 2018-12-13 A comprehensive and example oriented text for the study of chemical process design and simulation Chemical Process Design and Simulation is an accessible guide that offers information on the most important principles of chemical engineering design and includes illustrative examples of their application that uses simulation software A comprehensive and practical resource the text uses both Aspen Plus and Aspen Hysys simulation software The author describes the basic methodologies for computer aided design and offers a description of the basic steps of process simulation in Aspen Plus and Aspen Hysys The text reviews the design and simulation of individual simple unit operations that includes a mathematical model of each unit operation such as reactors separators and heat exchangers The author also explores the design of new plants and simulation of existing plants where conventional chemicals and material mixtures with measurable compositions are used In addition to aid in comprehension solutions to examples of real problems are included The final section covers plant design and simulation of processes using nonconventional components This important resource Includes information on the application of both the Aspen Plus and Aspen Hysys software that enables a comparison of the two software systems Combines the basic theoretical principles of chemical process and design with real world examples Covers both processes with conventional organic chemicals and processes with more complex materials such as solids oil blends polymers and electrolytes Presents examples that are solved using a new version of Aspen software ASPEN One 9 Written for students and academics in the field of process design Chemical Process Design and Simulation is a practical and accessible guide to the chemical process design and simulation using proven software *Learning and Intelligent Optimization* Ilias S. Kotsireas, Panos M. Pardalos, 2020-07-17 This book constitutes the refereed post conference proceedings on Learning and Intelligent Optimization LION 14 held in Athens Greece in May 2020 The 37 full papers presented together with one invited paper have been carefully reviewed and selected from 75 submissions LION deals with designing and engineering ways of learning about the performance of different techniques and ways of using past experience about the algorithm behavior to improve performance in the future Intelligent learning schemes for mining the knowledge obtained online or offline can improve the algorithm design process and simplify the applications of high performance optimization methods Combinations of different algorithms can further improve the robustness and performance of the individual components Due to the COVID 19 pandemic LION 14 was not held as a physical meeting Advances and Technology Development in Greenhouse Gases: Emission, Capture and Conversion Mohammad Reza Rahimpour, Mohammad Amin Makarem, Maryam Meshksar, 2024-07-13 Advances and Technology Development in Greenhouse Gases Emission Capture and Conversion is a comprehensive seven volume set of books that discusses the composition and properties of greenhouse gases and introduces different sources of greenhouse gases emission and the relation between greenhouse gases and global warming The comprehensive and detailed presentation

of common technologies as well as novel research related to all aspects of greenhouse gases makes this work an indispensable encyclopedic resource for researchers in academia and industry Volume 7 titled Process Modelling and Simulation reviews process modelling and simulation The book reviews modeling studies of GHGs emissions and surveys the details of carbon capture modelling with several well developed processes such as absorbers swing technologies and microstructures It addresses modelling of geological and ocean storage and reviews simulation studies of the chemical conversion of carbon dioxide to any valuable materials The book summarizes essential information required in the simulation and modelling of the processes which are beneficial in carbon capture storage or conversion Introduces modeling and simulation methods of carbon and methane emission Describes modeling and simulation procedures of producing chemicals from carbon as well as methane Discusses modeling and simulation of various technologies for carbon capture
