

Document Title: Description	Function Group: 000	Information Type: Service Information	Date: 21-Apr-22
Profile:			

Description

Both the L150 and the L180 are four-wheel drive loaders with articulated frame steering.

The engine in the L150 is a six-cylinder, four-stroke direct-injection, turbocharged diesel engine with the type designation TD102. In the L180 the engine is also a six-cylinder, four-stroke direct-injection, turbocharged diesel engine, but its type designation is TD122.

The transmission is a hydro-mechanical gearbox, where all gear wheels are in constant mesh. The transmission in the L150 has the type designation HT210 and in L180 the designation of the transmission is HT220.

A single-stage hydraulic torque converter is fitted between the engine and the transmission.

The front and rear axles have fully floating drive shafts with planetary type gears in the hubs. The front axle is provided with a differential lock.

The parking and service brakes of the machine are disc type brakes running in oil. The parking brake is positioned on the output shaft of the transmission and the service brakes are built integral with the respective planetary hub gears.

The steering system is hydrostatic with a variable load-sensing axial piston pump and two hydraulic cylinders (steering cylinders). Hydraulic system, see [invalid linktarget].
