in Education Kenneth Cushner,Averil McClelland,Hyla Cushner,Philip L. Safford,2021-03 It is difficult to fathom the myriad

changes that have occurred and that influence the content of this book in just three years since the previous edition As this

book goes to press we have witnessed many nations in Europe as well as the United States that have made dramatic political

shifts from open and liberal leanings to more populist nationalistic and conservative ideologies These shifts have been

accompanied by an increase in xenophobia and stricter actions to reduce immigration often accompanied by a rise in anti

immigrant anti Semitic and Islamophobic sentiment The conflicts and struggles in Afghanistan Iraq and Syria continue as

tensions between the United States and Russia fester A questioning of Truth with an onslaught of fake news has emerged

having a major influence on the 2016 U S presidential election And we expect numerous changes to occur under the new U S

Secretary of Education Betsy DeVos And these challenges are in the political arena alone Across the planet people continue

to feel the stresses of the seemingly endless changes and challenges they confront on many fronts Climate change continues

to advance resulting in new and unpredictable weather patterns despite a vocal minority that appears to deny its existence

span cultural differences and cut across geographic political and social boundaries continuing to impact us all at the local

national and global levels Some people are eager to embrace innovation and change while others struggle through a variety

of political and social means to retain older and more traditional ways of doing things Such challenges continue to enter and

impact our increasingly culturally diverse classrooms and communities To effectively address and solve the multitude of

issues we face it is incumbent upon teachers to provide young people with a foundation that will assist them to better

understand the complex nature of the world in which they will live while developing the skills that will enable them to be

proactive problem solvers in an interdependent global society This requires people who have the knowledge skills and

motivations to reach beyond their own cultural boundaries and a willingness and ability to collaborate with others If people

are not willing and able to do so these and other future problems simply will not be solved Developing intercultural

understanding and competence must be actively addressed throughout the school curriculum This tenth edition of Human

Diversity in Education An Intercultural Approach continues to focus on the preparation of teachers and other human service providers who can interact effectively with the wide diversity of people they are certain to encounter and who are able to transmit this knowledge and skill to the individuals in their charge **Farm Journal and Country Gentleman** ,1953
