Baecker, 2019-04-24 The last century has seen enormous leaps in the development of digital technologies and most aspects of modern life have changed significantly with their widespread availability and use Technology at various scales supercomputers corporate networks desktop and laptop computers the internet tablets mobile phones and processors that are hidden in everyday devices and are so small you can barely see them with the naked eye all pervade our world in a major way **Computers and Society Modern Perspectives** is a wide ranging and comprehensive textbook that critically assesses the global technical achievements in digital technologies and how they are applied in media education and learning medicine and health free speech democracy and government and war and peace Ronald M Baecker reviews critical ethical issues raised by computers such as digital inclusion security safety privacy automation and work and discusses social political and ethical controversies and choices now faced by society Particular attention is paid to new and exciting developments in artificial intelligence and machine learning and the issues that have arisen from our complex relationship with AI **Digital Disconnect** Robert W. McChesney, 2013-03-05 Celebrants and skeptics alike have produced valuable analyses of the Internet's effect on us and our world oscillating between utopian bliss and dystopian hell But according to Robert W McChesney arguments on both sides fail to address the relationship between economic power and the digital world McChesney's award winning **Rich Media Poor Democracy** skewered the assumption that a society drenched in commercial information is a democratic one In **Digital Disconnect** McChesney returns to this provocative thesis in light of the advances of the digital age incorporating capitalism into the heart of his analysis He argues that the sharp decline in the enforcement of antitrust violations the increase in patents on digital technology and proprietary systems and other policies and massive indirect subsidies have made the Internet a place of numbing commercialism A small handful of monopolies now dominate the political economy from Google which garners an astonishing 97 percent share of the mobile search market to Microsoft

whose operating system is used by over 90 percent of the world's computers. This capitalistic colonization of the Internet has spurred the collapse of credible journalism and made the Internet an unparalleled apparatus for government and corporate surveillance and a disturbingly anti-democratic force. In *Digital Disconnect* Robert McChesney offers a groundbreaking analysis and critique of the Internet urging us to reclaim the democratizing potential of the digital revolution while we still can. *Buyer Aware* Marta L. Tellado, 2022-09-20. In an era of corporate overreach when consumers have never been more vulnerable to digital surveillance, unsafe food and dangerously faulty products, the president and CEO of Consumer Reports gives us a playbook to put the power back in our hands. You've been getting ripped off. The rules that have protected consumers for decades are failing. Companies are spying on us. Many of the products we once trusted are dangerous and failing at alarming rates. Whether we are buying a crib, a small appliance, an iPhone app or shopping for car insurance, it's become harder than ever to know whether the choices we make in the marketplace are putting us at risk either from physical harm or the abuse of our personal data by hackers or corporations. This is intolerable. It's wrong. And we don't have to put up with it anymore. Marta L. Tellado, the president and CEO of Consumer Reports has been an advocate for consumers for decades. In *Buyer Aware*, Tellado shows you the steps you can take to protect yourself from predatory business practices and how to exert your inherent power as a consumer to spur politicians and businesses to clean up their act. Only then can we ensure that we have an economy that is fair, safe and transparent for all and puts consumers first.

[Taking Advantage of Emerging Technologies in Clinical Practice](#), 2012. *Smart* Frederic Martel, 2018-07-05. Digitization is accelerating globalization tenfold. Social networks have gone mobile, telephone, television and towns have gone smart. How did China manage to create clones of Google, Facebook and YouTube and build its own censored version of the Internet? How do Arab countries use social networks for their revolutions? Why is there no minister for communications in the US and why does no one regulate the Internet there? From Silicon Valley to Tokyo, from South Africa to southern India and all the way to Cuba and Gaza, this unprecedented investigation in the field covers the whole battle of the Internet and its future. Drawing on hundreds of interviews in about fifty countries, Frederic Martel examines the different Internets on five continents. In so doing, he reveals that we are moving not only into a connected, globalized world but also a territorialized one. *Smart* shows that the Internet has never been truly global and that it will become increasingly local.

NEW YORK TIMES BESTSELLER USA TODAY BESTSELLER. Amazon, Apple, Facebook and Google are the four most influential companies on the planet. Just about everyone thinks they know how they got there. Just about

everyone is wrong For all that's been written about the Four over the last two decades no one has captured their power and staggering success as insightfully as Scott Galloway Instead of buying the myths these companies broadcast Galloway asks fundamental questions How did the Four infiltrate our lives so completely that they're almost impossible to avoid or boycott Why does the stock market forgive them for sins that would destroy other firms And as they race to become the world's first trillion dollar company can anyone challenge them In the same irreverent style that has made him one of the world's most celebrated business professors Galloway deconstructs the strategies of the Four that lurk beneath their shiny veneers He shows how they manipulate the fundamental emotional needs that have driven us since our ancestors lived in caves at a speed and scope others can't match And he reveals how you can apply the lessons of their ascent to your own business or career Whether you want to compete with them do business with them or simply live in the world they dominate you need to understand the Four
