*De Gruyter Handbook of Media Technology and Innovation* Richard A. Gershon, 2025-01-27 The De Gruyter Handbook of Media Technology and Innovation brings together scholars from around the world to provide key insights on emerging technology trends and issues related to the fields of media management, information technology, product design, planning and digital lifestyle. This handbook is about the power of good ideas. It's about those business enterprises, government planners, educators and entrepreneurs that have harnessed the power of good ideas to become real difference makers in the world we live in. Keeping pace with fast paced technology change requires ongoing assessment and reassessment of the media management and technology fields to address important questions and emerging issues. A major premise of this book is that given the complex and ever changing state of media technology we have a responsibility and obligation to engage in a broader interdisciplinary dialogue whose purpose is to understand the current and future state of media technology and innovation as well as to appreciate the social impact that such technologies have on business education and the general public. Forecasting the future as any weatherperson or stock broker can tell you is a risky business. But in this book we use the phrase the creative next step as a way to talk about the future and what we can expect in terms of the opportunities and challenges going forward.

**Illegal Online File Sharing, Decision-Analysis, and the Pricing of Digital Goods** Michael I. C. Nwogugu, 2016-11-03 Illegal online file sharing costs companies tens of billions of dollars of lost revenues around the world annually and results in lost productivity, various psychological issues and significant reduction of incentives to create and innovate. Legislative, technical and enforcement efforts have failed. This book presents psychological theories about why people illegally share files online, analyzes and characterizes optimal sanctions for illegal online file sharing, introduces new models for pricing of network access and digital content to help reduce illegal online file sharing, introduces new content control and P2P systems and explains why game theory does not work in pricing of network access.

*Behavior Dynamics in Media-Sharing Social Networks* H. Vicky Zhao, W. Sabrina Lin, K. J. Ray Liu, 2011-04-14 In large scale media sharing social networks where millions of users create, share, link and reuse media content there are clear challenges in protecting content.

security and intellectual property and in designing scalable and reliable networks capable of handling high levels of traffic. This comprehensive resource demonstrates how game theory can be used to model user dynamics and optimize design of media sharing networks. It reviews the fundamental methodologies used to model and analyze human behavior using examples from real world multimedia social networks. With a thorough investigation of the impact of human factors on multimedia system design this accessible book shows how an understanding of human behavior can be used to improve system performance. Bringing together mathematical tools and engineering concepts with ideas from sociology and human behavior analysis this one stop guide will enable researchers to explore this emerging field further and ultimately design media sharing systems with more efficient secure and personalized services.

**Wi - Max Technology. A Survey** Hardik Modi, Chirag Umaretiya, 2015-01-05 Document from the year 2014 in the subject Engineering Communication Technology language English abstract Worldwide Interoperability for Microwave Access. WiMAX is a wireless communications technology. As the global economy continues to expand so does the demand for information. This information needs to be plentiful diversified instant sprinkled and mobile all at the same time. These mounting demands have proven difficult for existing network capacity coverage and range also. And this reduces an organizations ability to evolve with changing business and workforce needs. Wireless networks are best suited to meet these challenges because they are resilient scalable mobile and cost effective. It facilitates the network with high speed high quality data voice and video communication even when users are on the move. The rapid growth of WIFI in the home enterprise and public hotspot market has given users and service providers alike a new glimpse into what wireless connectivity can deliver through a single interface in multiple locations. WIFI realizes the vision of broadband connectivity within the LAN Local Area Network and has easy way for new wireless technologies that can deliver the same experience in the MAN Metropolitan Area Network and in the WAN Wide Area Network.
