## Reddit How To:

**How to Handle a Crowd** Anika Gupta, 2020-08-18 A guide to successful community moderation exploring everything from the trenches of Reddit to your neighborhood Facebook page. Don't read the comments. Old advice yet more relevant than ever. The tools we once hailed for their power to connect people and spark creativity can also be hotbeds of hate, harassment and political division. Platforms like Facebook, YouTube and Twitter are under fire for either too much or too little moderation. Creating and maintaining healthy online communities isn't easy. Over the course of two years of graduate research at MIT, former tech journalist and current product manager Anika Gupta interviewed moderators who'd worked on the sidelines of gamer forums and in the quagmires of online news comments sections. She's spoken with professional and volunteer moderators for communities like Pantsuit Nation, Nextdoor, World of Warcraft guilds, Reddit and FetLife. In "How to Handle a Crowd" she shares what makes successful communities tick and what you can learn from them about the delicate balance of community moderation. Topics include Building creative communities in online spaces, Bridging political division and creating new alliances, Encouraging freedom of speech, Defining and eliminating hate and trolling, Ensuring safety for all participants, Motivating community members to action. "How to Handle a Crowd" is the perfect book for anyone looking to take their small community group to the next level, start a career in online moderation or tackle their own business's comments section.

*Designing for Democracy* Jennifer Forestal, 2022 How should we fix digital technologies to support democracy instead of undermining it? In "Designing for Democracy" Jennifer Forestal argues that accurately evaluating the democratic potential of digital spaces means studying how the built environment, a primary component of our modern public square structures, our activity shapes our attitudes and supports the kinds of relationships and behaviors democracy requires. While many scholars and practitioners are attentive to the role of design in shaping behavior, they have yet to fully engage with the question of what structures are required to support democratic communities and how to build them. Forestal closes this gap by providing a new theory of democratic space. Drawing from a wide range of disciplines including architecture, psychology and the history of political thought, she argues that democratic spaces must be designed with three environmental characteristics: boundaries, durability and flexibility, that taken together afford users the ability to engage in fundamental civic practices. Through extended analyses of Facebook, Twitter and Reddit, Forestal shows precisely how well these digital platforms meet the criteria for democratic spaces or whether they do so at all. The result is a more nuanced analysis of the democratic communities that form or fail to emerge in these spaces, as well as more concrete suggestions for how to improve them. In connecting the built environment, digital technologies and democratic theory, "Designing for Democracy" provides blueprints for democracy in a digital age.

**The Case for Community in Online Spaces** Brooke Dunbar-Treadwell, 2023-08-01 Many believe that our sense of community is dying as the result of our digitized world. Intended Consequences: How to Build Market-Leading Companies with Responsible Innovation Hemant Taneja, Kevin Maney, 2022-01-25 WALL STREET JOURNAL BESTSELLER A pioneering venture capitalist provides an actionable framework for founders and

executives to create innovative enduring companies built for growth and for societal good The Milton Friedman philosophy that companies exist only to increase shareholder value is dead and buried The old Silicon Valley tenets of move fast and break things minimum viable products and hyper engagement at any cost must be replaced with new principles for an era of responsible innovation We can no longer manage businesses solely for growth With innovation comes responsibility to

generate returns beyond profits and to recenter technology as a force for good in the world. This requires a shift in the way organizations approach and value work. A company's mindset, its intent to do good, avoid harmful consequences and innovate responsibly, is not enough. That mindset must be supported by a business model, a mechanism that leaders must intentionally and proactively build along with the company from the ground up, one that incentivizes and rewards the organization for fulfilling its intentions. Companies need a new set of KCIs or key consequence indicators that measure factors such as its impact on customers' energy consumption, whether its product is being used equally across socioeconomic groups, or if it is actually solving the social problem it is addressing. Not only is this the right thing to do, increasingly it is what customers, employees and shareholders demand of business. In this inspiring, practical and actionable guide, Hemant Taneja lays out the argument for why a new model of company building and leadership is necessary and how it can lead to better performance. It explores why social good businesses are some of the greatest opportunities today, detailing examples of billion dollar startups that are addressing inequality, climate change, systemic societal problems and chronic disease, all while generating profit and positive shareholder returns. It presents a topic by topic road map that addresses business models, artificial intelligence, ethical growth, culture, governance and good citizenship. Intended Consequences is designed as the ultimate playbook for founders, entrepreneurs, leadership teams and investors on how to build and maintain a responsible innovation company.
