The Hidden Psychology of Social Networks: How Brands Create Authentic Engagement by Understanding

What Motivates Us Joe Federer, 2020-09-15 From the former Head of Brand Strategy at Reddit comes a proven and thought provoking approach to the digital economy and how brands can create authentic engagement that is rooted in the fundamental motivations behind human psychology. Leading marketing practitioner and thought leader Joe Federer draws on evolutionary biology, anthropology, neuroanatomy, and psychology as well as more than a decade of hands on experience to explain why people act so differently in various online spaces and what they are seeking from participating in each one. With a framework based on Freud's Id, Ego, and Superego model of the human psyche, he demonstrates how the internet is a digital reflection of the collective human psyche and how different social networks correspond to different mindsets. Platforms like Reddit to the unfiltered Id, Facebook and Twitter to the managed Ego, and Instagram to the ideal Superego. In the same way you behave differently when you're home alone, out with friends, communicating with family, or interacting with coworkers, people act and express themselves differently in these various online spaces. Context matters. Understanding this will enable you to develop and execute effective engagement strategies to reach your target audiences on each social network. Learn how to create content that drives sharing and word of mouth, how brands can fit natively into different types of social channels, how to balance branded social presences across different networks, why authenticity will only grow in importance to consumers. Fascinating and deeply compelling, *The Hidden Psychology of Social Networks* will equip you to make vastly more efficient use of your media buys, establish more thoughtful strategies, develop better creative, and in the end, deliver more effective marketing that provides value.

Bulletin, 1988 **Musica Scientia** Ann Elizabeth Moyer, 1992 Theories of music and its nature central to many aspects of Renaissance thought have nonetheless been difficult to integrate into modern scholarship. In *Musica Scientia*, Ann E. Moyer asserts that the Renaissance discipline must be understood in the terms of other contemporary fields of knowledge. Moyer begins with a clear and concise historical summary of ancient and medieval musical thought, emphasizing the importance of the Pythagorean teachings about music transmitted to the medieval world through Boethius's *De institutione arithmeticæ*. Describing the factors that in the late fifteenth century led scholars and practicing musicians to raise new questions about the discipline and its study, Moyer closely analyzes the writings of the sixteenth century Italians who debated the nature of music and its relationship to mathematics, the natural sciences, poetry, and rhetoric. Renaissance thinking about music she shows wrought a dramatic change in the understanding of the field: scholars came to distinguish between a science of

sounding bodies and an art of music an art to be studied in terms of poetics and the history of taste Moyer's book offers a new and systematic treatment of a critical but neglected aspect of Renaissance thought. It makes a significant contribution to our understanding of the classification of knowledge in the Renaissance and of the process by which two competing kinds of analysis humanistic and mathematical came to distinguish the modern arts and sciences.
