Forrest Mims' Science Experiments Forrest M. Mims III, 2016-08-03 Forrest M. Mims is a revered contributor to Make magazine where his popular columns about science related topics and projects for Makers are evergreen treasures. Collected together here for the first time these columns range from such simple projects as building an LED tracker for hand launched night rockets to such challenging builds as transforming strings of data into unique musical compositions. A variety of photography and imaging projects are featured including an ultra sensitive twilight photometer that measures the elevation of layers of dust, smoke and smog from around 3 000 feet to the top of the stratosphere at 31 miles. Most of the projects can be done with a collection of simple electronic components such as LEDs, transistors, resistors and batteries. To inspire and motivate readers the book also includes profiles of such famous Makers as President Thomas Jefferson and Microsoft co-founder Paul Allen.
