CHAPTER VI THE METHOD OF POSITIVE BENEVOLENCE IN THE LAW OF DEATH IN approaching this more personal part of the problem of mortality we shall seek first to apprehend the utilities of physical death for the immortality of the human race as a whole for if we succeed in grasping the nearer end of any great principle of life our thought may swing itself up by it to higher and more fruitful conceptions of the truth Ignoring for the moment our personal desires of life and man's many sorrows it will prove of advantage if we may gain some clear broad view of the utility for our humanity as a whole of the natural law of death If we succeed occasionally in seeing things as a whole as a prophet once said it will become less difficult for us to understand and to accept with cheerfulness our personal place and part in an order of providence which in its largeness and completeness is seen to be benign The author has indicated the usefulness of this method of faith in his Personal Creeds pp 55 seq One of these first more evident utilities of death for human life as a whole consists in the immense enlargement through its means of this earth as a field for the birth and training of a race of immortals In natural history one of the vital questions concerns the field for life whether it is large and rich or sheltered enough to secure the maintenance and spread of vegetation and to afford animal life ample opportunity for its increase If the field is crowded or barren or if it lies exposed to destructive elements then among the plants and animals the struggle will become severe and the possible amount of the variety beauty and joyousness of life in that too limited field will be reduced to narrow limits Upon the same field of *The Journal of Philosophy*, 1908 Covers topics in philosophy psychology and scientific methods Vols 31 include A Bibliography of philosophy 1933 Death on Earth Jules Howard, 2016-03-10 There is nothing more life affirming than understanding death in all its

forms Natural selection depends on death little would evolve without it Every animal on Earth is shaped by its presence and fashioned by its spectre We are all survivors of starvation drought volcanic eruptions meteorites plagues parasites predators freak weather events tussles and scraps and our bodies are shaped by these ancient events Some animals live for just a few hours as adults others prefer to kill themselves rather than live unnecessarily for longer than they are needed and there are a number of animals that can live for centuries There are parasites that drive their hosts to die awful deaths and parasites that manipulate their hosts to live longer healthier lives There is death in life Amongst all of this there is us the upright ape perhaps the first animal in the history of the universe fully conscious that death really is going to happen to us all in the end With a narrative featuring a fish with a fake eye the oldest animal in the world the immortal jellyfish and some of the world's top death investigating biologists Death on Earth explores the never ending cycle of death and the impact death has on the living and muses on how evolution and death affect us every single day Why are we so weird about death Where does this fear come from Why are we so afraid of ageing And how might knowledge of ageing in other animals help us live better lives free of the diseases of old age
