[Prolegomena to Any Future Materialism](#) Adrian Johnston, 2019-09-15 Adrian Johnston's trilogy *Prolegomena to Any Future Materialism* aims to forge a thoroughly materialist yet antireductive theory of subjectivity In this second volume *A Weak Nature Alone* Johnston focuses on the philosophy of nature required for such a theory This volume is guided by a fundamental question How must nature be rethought so that human minds and freedom do not appear to be either impossible or inexplicable within it Asked differently How must the natural world itself be structured such that sapient subjects in all their distinctive peculiarities emerged from and continue to exist within this world In *A Weak Nature Alone* Johnston develops his transcendental materialist account of nature through engaging with and weaving together five main sources of inspiration Hegelian philosophy Marxist materialism Freudian Lacanian metapsychology Anglo American analytic neo Hegelianism and evolutionary theory and neurobiology Johnston argues that these seemingly but not really strange bedfellows should be brought together so as to construct a contemporary ontology of nature Through this ontology nonnatural human subjects can be seen to arise in an immanent bottom up fashion from nature itself

*The Return of Nature* John Bellamy Foster, 2021-06-01 Winner 2020 Isaac and Tamara Deutscher Memorial Prize A fascinating reinterpretation of the radical and socialist origins of ecology Twenty years ago John Bellamy Foster's *Marx's Ecology: Materialism and Nature* introduced a new understanding of Karl Marx's revolutionary ecological materialism More than simply a study of Marx it commenced an intellectual and social history encompassing thinkers from Epicurus to Darwin who developed materialist and ecological ideas Now with *The Return of Nature: Socialism and Ecology* Foster continues this narrative In so doing he uncovers a long history of the efforts to unite questions of social justice and environmental sustainability and helps us comprehend and counter today's unprecedented planetary emergencies *The Return of Nature*

begins with the deaths of Darwin 1882 and Marx 1883 and moves on until the rise of the ecological age in the 1960s and 1970s Foster explores how socialist analysts and materialist scientists of various stamps first in Britain then the United States from William Morris and Frederick Engels to Joseph Needham Rachel Carson and Stephen J Gould sought to develop a dialectical naturalism rooted in a critique of capitalism In the process he delivers a far reaching and fascinating reinterpretation of the radical and socialist origins of ecology Ultimately what this book asks for is nothing short of revolution a long ecological revolution aimed at making peace with the planet while meeting collective human needs *The Dialectics of Ecology* John Bellamy Foster, 2024-04-01 Explores ecological socialism s potential against capitalist environmental degradation Today the fate of the earth as a home for humanity is in question and yet contends John Bellamy Foster the reunification of humanity and the earth remains possible if we are prepared to make revolutionary changes As with his prior books *The Dialectics of Ecology* is grounded in the contention that we are now faced with a concrete choice between ecological socialism and capitalist exterminism and rooted in insights drawn from the classical historical materialist tradition In this latest work Foster explores the complex theoretical debates that have arisen historically with respect to the dialectics of nature and society He then goes on to examine the current contradictions associated with the confrontation between capitalist extractivism and the financialization of nature on the one hand and the radical challenges to these represented by emergent visions of ecological civilization and planned degrowth on the other The product of contemporary ecosocialist debates *The Dialectics of Ecology* builds on earlier works by Foster including Marx s *Ecology and The Return of Nature* aimed at the development of a dialectical naturalism and the formation of a path to sustainable human development
