The Democratic Imagination Envisioning Popular Power In The Twenty First Century:

The Democratic Imagination James Irvine Cairns, Alan Sears, 2012-01-01 The Democratic Imagination examines different conceptions of democracy exploring tensions that emerge in key moments and debates in the history of democracy from Ancient Greece to the French Revolution to contemporary Egypt

Communes and the Venezuelan State Anderson Bean, 2022-03-01 Since 2006 Venezuela has witnessed an explosion of different forms of popular power and participatory democracy Over 47 000 grassroots neighborhood based communal councils and 3 000 communes have been constructed In Communes and the Venezuelan State The Struggle for Participatory Democracy in a Time of Crisis Anderson Bean offers a critical analysis of these experiments in popular and workers power and their potential for societal transformation within and beyond Venezuela Drawing on extensive ethnographic research Bean demonstrates how workers and peasants through networks of popular power exercise agency over their own development while facing challenges from the capitalist state Most importantly this book connects with the far reaching implications that the communal movement in Venezuela has for building a society responsive more to the needs of ordinary people than to the desires of the elites

The Myth of the Age of Entitlement James Cairns, 2017-07-28 In The Myth of the Age of Entitlement Cairns peels back the layers of the entitlement myth exposing its faults and arguing that the majority of millennials are actually disentitled facing bleak economic prospects and potential ecological disaster

Cultural Capital and Prospects for Democracy in Botswana and Ethiopia Asafa Jalata, 2019-05-16 This book focuses on and examines the impact of cultural capital political economy social movements and political consciousness on the potential development of substantive democracy in Botswana and Ethiopia While explaining the challenges obstacles and opportunities for the development of democracy Cultural Capital and Prospects for Democracy in Botswana and Ethiopia engages in defining democracy as a contested open and expanding concept through a comparative and historical examination The book s analysis employs interdisciplinary multidimensional comparative methods and critical approaches to examine the dynamic interplay among social structures human agencies cultural factors and social movements This comparative and historical study has required an examination of critical social history that looks at societal issues from the bottom up specifically critical discourse and the particular world system approach which deal with long term and large scale social changes Cultural Capital and Prospects for Democracy in Botswana and Ethiopia will be of interest to scholars and students of African politics political theory and democratization

Political Consciousness and American Democracy James F. Lea, 1982 Lea contends that the concept of majority rule democracy is not in fact practiced in the U S because the average American s political consciousness is diminished to the point that most Americans have not fully realized their political selves Lea examines how the various modes of political socialization that have developed in the U S weaken that consciousness and how contemporary conceptions of citizenship mass behavior and leadership adversely affect it He concludes that the recasting of American society is needed if democracy is to be fully realized

Retooling the Mind Factory

Alan Sears,2003-01-01 Alan Sears examines education reform in relation to a broad process of cultural and economic change His book makes the case that education reform is one aspect of a broad ranging neo liberal agenda that aims to push the market deeper into every aspect of our lives by eliminating or shrinking non market alternatives The author begins by showing that advocates of education reform have had to make the case that the current system is not working This sets the ground for an examination of the so called Common Sense Revolution a claim that drastic change was required to redesign government policies to fit a changing world Lean production methods are a crucial component of this changing world and broader social and cultural change is now required to consolidate the emerging order built on the spread of these methods Education reform is designed to recast the relations of citizenship contributing to the cultural and social change promoted through the social policy of the lean state

Hanson,1985 This is an interesting and absorbing study The author seeks to delineate democracy as an operative concept in American life over time its meanings have shifted and these shifts both symbolize changes in our politics and help to constitute these changes Hanson s critical use of American history is persuasive and distinctive and he will find a large audience William E Connolly University of Massachusetts

[The Eyes of the People](#) Jeffrey Edward Green,2009-12-31 For centuries it has been assumed that democracy must refer to the empowerment of the People s voice In this pioneering book Jeffrey Edward Green makes the case for considering the People as an ocular entity rather than a vocal one Green argues that it is both possible and desirable to understand democracy in terms of what the People gets to see instead of the traditional focus on what it gets to say The Eyes of the People examines democracy from the perspective of everyday citizens in their everyday lives While it is customary to understand the citizen as a decision maker in fact most citizens rarely engage in decision making and do not even have clear views on most political issues The ordinary citizen is not a decision maker but a spectator who watches and listens to the select few empowered to decide Grounded on this everyday phenomenon of spectatorship The Eyes of the People constructs a democratic theory applicable to the way democracy is actually experienced by most people most of the time In approaching democracy from the perspective of the People s eyes Green rediscovers and

rehabilitates a forgotten plebiscitarian alternative within the history of democratic thought Building off the contributions of a wide range of thinkers including Aristotle Shakespeare Benjamin Constant Max Weber Joseph Schumpeter and many others Green outlines a novel democratic paradigm centered on empowering the People s gaze through forcing politicians to appear in public under conditions they do not fully control The Eyes of the People is at once a sweeping overview of the state of democratic theory and a call to rethink the meaning of democracy within the sociological and technological conditions of the twenty first century
