The Determinants of Economic Growth Maaïke S. Oosterbaan, Thijs de Ruyter van Steveninck, Nico van der Windt, 2012-12-06 Determinants of economic growth An overview Thijs de Ruyter van Steveninck Nico van der Windt and Maaïke Oosterbaan Netherlands Economic Institute What causes economic growth Why have some countries grown much faster than others Why do some countries not grow at all or even experience negative per capita growth rates What can governments do to raise the growth rates of their country These questions were discussed at a conference on March 23 and 24 1998 organized by the Netherlands Economic Institute NEI on behalf of the Netherlands Ministry of Foreign Affairs This book contains the proceedings of the conference Economic growth is widely considered as a necessary though not sufficient condition for poverty alleviation During the past two decades scholars and researchers have found a renewed interest in thinking about economic growth and advances in the understanding of economic growth have taken place On the one hand the theoretical understanding of growth has progressed on various fronts including endogenous technological innovation and increasing returns to scale the interaction of population fertility human capital and growth international spill overs in technology and capital accumulation and the role of institutions On the other hand the increasing availability and use of data sets has given a large incentive to empirical research on cross country growth following the path breaking work of Barro 1991

The Determinants of Economic Growth Robert William Adler, 1959 Determinants of Economic Growth Robert J. Barro, 1997 Summarizes recent research from hundreds of empirical studies on economic growth across countries that have highlighted the correlation between growth and a variety of variables *Three Essays on the Determinants of Economic Growth* Gernot Doppelhofer, 2000 **Determinants of Growth (General) and Regional Growth, Theory and Evidence** Marco Alexander Caiza Andresen, 2007-07 Seminar paper from the year 2006 in the subject Economics Economic Cycle and Growth grade 1 7 University of Paderborn Faculty of Economics Business Administration and Business Computing course Research and Independent Studies in International Economics 71 entries in the bibliography language English abstract The aim of this term paper is to find out what causes economic growth through analyzing determinants of growth in general and of regional growth both in theory and evidence The question why some countries grow significantly slower than others has been discussed intensively over the last decades By thorough study of literature the main determinants will be indicated and similarities and differences between general and regional growth become visible After a short introduction in the second chapter the main growth determinants will be presented individually for the general and the regional area each time also an introduction to the extensive literature theory and empirics of the specific area will be given beforehand In the last chapter a conclusion will be drawn and an answer given to the question on which are the key determinants by comparing them with each other and in how far the results do distinguish on general and regional level **The Determinants of Economic Growth** Paul Michael Romer, 1993 **Three Empirical Essays on the Determinants of Economic Growth** Oliver

Röhn,2007 **Determinants of Economic Growth** Robert J Barro,2014-05-13 Summarizes recent research from hundreds of empirical studies on economic growth across countries that have highlighted the correlation between growth and a variety of variables The Determinants of Economic Growth : The Role of Infrastructure Prince Fosu,2019 **An Empirical Study of the Determinants of Economic Growth** W. Robert J. Alexander,1992 **National Competitiveness and Economic Growth** Timo J. Hämmäläinen,2003 The current paradigm shift in the world economy is challenging the traditional competitiveness and growth theories with their few explanatory variables This book offers a more holistic framework to synthesise the key findings of the various branches of competitiveness and growth research The author illustrates this framework with a new long wave theory of socio economic development This theory emphasises the competitiveness and growth benefits of rapid structural adjustment in the rapidly changing techno economic environment Based on thorough analysis the author argues that both markets and governments have become less efficient due to the current transformation of the world economy His empirical data from 22 OECD countries in the 1980s and 1990s illustrates that efficiency and growth oriented governments have significantly contributed to their countries economic success National Competitiveness and Economic Growth will furnish its readers with a better understanding of the interdependencies of many important but seemingly unrelated aspects of modern economies and societies for example the dynamics of business and technology and cultural and institutional change It will appeal to economists business professionals and policymakers with a special interest in the competitiveness and growth of firms and national economies as well as the long term development of socio economic systems **Three Essays on the Determinants of Economic Growth [Microforma]** María Jesús Freire Serén,1999

Progress and Puzzles in Understanding the Determinants of Economic Growth Paul Romer,Canadian Institute for Advanced Research Program in Economic Growth and Policy,1995 **The Determinants of Economic Growth** William Tate Helms,2001 **Economic Growth and Its Determinants: A Panel Analysis** Victor Alfonso Bustamante,2020

Economic growth is widely studied by economists as economic growth rates differ from country to country over a period of time This paper uses data from 2010-2018 across 11 countries to analyze the determinants of economic growth The results from the panel analysis show that economic growth GDP is related to various explanatory variables The results found that labor productivity and government consumption had relevant significance in determining economic growth across a timespan of 9 years Unlike labor productivity there were some interesting findings in the research Capital formation education attainment and trade were of no significance to economic growth a surprising outcome Determinants of Economic Growth in Africa Almas Heshmati,2018-05-16 This volume is a collection of selected empirical studies on determinants of economic growth in Africa Grouped into three parts chapters examine the influence of financial sources and economic growth sources of productivity growth and prices exchange rates and trade relationships with growth in regions in Africa or the continent as a whole This edited book is authored by African experts in the field who employ diverse up to date data and

methods to provide robust empirical results based on representative firms household surveys and secondary country level data covering individuals or multiple countries on the continent It contains a wealth of empirical evidence deep analyses and sound recommendations for policymakers and researchers for designing and implementing effective social and national policies and strategies to prevent and to reduce poverty and its negative effects on poor households and in poor regions The volume will be a useful resource for policymakers and researchers involved in promoting economic growth and fighting poverty It will also appeal to a broader audience interested in economic development resource economics policies economic welfare and inclusive growth A New Look at the Determinants of Growth in Asian Countries Mr.Manuk

Ghazanchyan,Ms.Janet Gale Stotsky,Qianqian Zhang,2015-09-03 This study examines the drivers of growth in Asian countries with focus on the role of investment the exchange rate regime financial risk and capital account openness We use a panel data set of a sample of Asian countries over the period 1980 to 2012 Our results indicate that private and public investments are strong drivers of growth while more limited evidence is found that reduced financial risk and higher foreign direct investment support growth The exchange rate regime does not appear to be a strongly significant determinant of growth but some specifications suggest that more flexible regimes are beneficial in this respect Financial crises have a stronger dampening effect on growth in countries with more open capital accounts The Determinants of Economic Growth in

Selected Northeastern Manufacturing Sectors Mark Menchin,1986 *Demographic Change and Economic Growth* Lars Weber,2010-08-02 In this book the author investigates the impact of demographic change on economic growth As a result of the current financial crisis a new view on economics has been demanded by various scientists The author provides such a new view on economic growth using a methodology of system dynamics By applying this method the author focuses on characteristics of complex systems and analyzes aging and shrinking processes and not only positive growth Delays and feedback processes are also considered This leads to deeper and revealing insights into economic behavior In doing so a new semi endogenous growth model is developed by introducing a specific and detailed population sector demographic growth model The book shows and analyzes the behavior of such a model and tests several policy scenarios in a transfer chapter to apply the new theoretical approach on real world problems The major results are summarized in 15 principles of demographic growth *The Determinants of U.S. State Economic Growth* William Robert Reed,2006
