The Architectural Imagination at the Digital Turn Nathalie Bredella, 2022-06-29 The Architectural Imagination at the Digital Turn asks what it means to speak of a digital turn in architecture It examines how architects at the time engaged with the digital and imagined future modes of practice and looks at the technological conceptual and economic phenomena behind this engagement It argues that the adoption of digital technology in architecture was far from linear but depended on complex factors from the operative logic of the technology itself to the context in which it was used and the people who interacted with it Creating a mosaic like account the book presents debates projects and publications that changed how architecture was visualized fabricated and experienced using digital technology Spanning the university new media art institutes ecologies architectural bodies fabrication and the city it re evaluates familiar narratives that emphasized formal explorations instead the book aims to complicate the myth of the digital by presenting a nuanced analysis of the material and social context behind each case study During the 1990s architects repurposed software and technological concepts from other disciplines and tested them in a design environment Some architects were fascinated by its effects others were more critical Through its discussion on case studies places and themes that fundamentally influenced discourse formation in the era this book offers scholars researchers and students fresh insights into how architecture can engage with the digital realm today

The Second Digital Turn Mario Carpo, 2017-10-20 The first digital turn in architecture changed

our ways of making the second changes our ways of thinking Almost a generation ago the early software for computer aided design and manufacturing CAD CAM spawned a style of smooth and curving lines and surfaces that gave visible form to the first digital age and left an indelible mark on contemporary architecture But today s digitally intelligent architecture no longer looks that way In The Second Digital Turn Mario Carpo explains that this is because the design professions are now coming to terms with a new kind of digital tools they have adopted no longer tools for making but tools for thinking In the early 1990s the design professions were the first to intuit and interpret the new technical logic of the digital age digital mass customization the use of digital tools to mass produce variations at no extra cost has already changed the way we produce and consume almost everything and the same technology applied to commerce at large is now heralding a new society without scale a flat marginal cost society where bigger markets will not make anything cheaper But today the unprecedented power of computation also favors a new kind of science where prediction can be based on sheer information retrieval and form finding by simulation and optimization can replace deduction from mathematical formulas Designers have been toying with machine thinking and machine learning for some time and the apparently unfathomable complexity of the physical shapes they are now creating already expresses a new form of artificial intelligence outside the tradition of modern science and alien to the organic logic of our mind

The Multi-Skilled Designer Newton D'souza,2019-11-21 The Multi Skilled Designer presents and analyzes different approaches to contemporary architectural design and interprets them through the theory of multiple intelligences The book establishes a systematic framework that uses the lens of cognitive psychology and developments in psychometric and brain research to analyze the unique cognitive thought processes of architectural designers and compiles design projects that could serve as a pedagogical companion for the reader The book is aimed at design practitioners and students interested in examining their own thinking styles as well as those involved in design cognition research

Architectural Design and Management in the Digital Age Bob Giddings,Silvio Melhado,Jennifer Barrett,2024-09-02 Critical appraisal of architectural design and management in the digital age through international perspectives Architectural Design and Management in the Digital Age delivers an evaluation of digitalisation in the evolving processes of architecture providing a holistic treatment of the subject in terms of technologies human context emerging concepts and the management of digital projects This book includes analysis of the advantages of digital technology in appropriate circumstances but also to appreciate that alternative methods may continue to provide considerable benefits for other situations the implications of the digital world for creativity and architectural quality the diversity of people who could be involved and reaching the disadvantaged and disenfranchised the role of the architect and other professionals within design and management processes how emphasis on data management is creating diverging practices which involve new concepts and definitions that require interpretation especially with regard to experiences of design processes in different countries Providing fresh reflections on a myriad of timely topics Architectural Design and Management in the Digital Age
