**The Domestic Dog** James Serpell, 1995

**The Domestic Dog** James Serpell, 1995 By any standards dogs are extraordinary animals They have been part of human society for longer than any other domestic species They exist in a greater variety of different shapes and sizes and they occupy a wider ecological niche from pampered pets and faithful servants to feral scavengers Even our attitudes to dogs seem to oscillate between extremes On the one hand the dog is man's best friend on the other he is the despised and degraded outcast This unique book seeks to expose the real dog beneath the popular stereotypes Its purpose is to provide a comprehensive state of the art account of the domestic dog's natural history and behaviour based on scientific and scholarly evidence rather than hearsay Anyone with a serious interest in *Canis familiaris* its evolution behaviour and its place in our society will find *The Domestic Dog* an indispensable and fascinating resource

The Behavioural Biology of Dogs Per Jensen, 2007 Written by experts in different areas this book presents an up to date account of the behavioural biology of dogs Split in 3 parts the book addresses the specific aspects of behavioural biology The first part deals with the evolution and development of the dog whereas the next part deals with basic aspects of dog behaviour The final part emphasises on the behavioural problems their prevention and cure

in the New World Discussion of several distinctive modern roles of dogs underscores the social bond between dogs and people
