TikTok and Youth Cultures Crystal Abidin, 2025-11-04 Using anthropological methods to produce deep and insightful ethnographies about TikTok and its core users TikTok and Youth Cultures will help readers develop a critical understanding of TikTok's impact on society its place in the social media landscape and its cultural relevance around the world Data Sovereignty Anupam Chander, Haochen Sun, 2023 The internet was supposed to end sovereignty Governments of the Industrial World you weary giants of flesh and steel you have no sovereignty where we gather John Perry Barlow famously declared Sovereignty would prove impossible over a world of bits with the internet simply routing around futile controls But reports of the death of sovereignty over the internet proved premature Consider recent events *Entertained or Else* Tina Kendall, 2025-09-18 This book considers the complex and often contradictory relations that are forged between boredom and everyday media use in the twenty first century and demonstrates how networked media have developed new technical means of capitalizing on boredom's state of suspension to make it into a source of value creation Focusing on the discursive technological and affective structures that encourage users to be entertaining and to remain entertained the book analyses how boredom has been increasingly instrumentalized as both an individual mood and a wider structure of feeling that drives participation across media networks It identifies the range of cultural techniques for codifying classifying sensing and preempting boredom as well as those that teach users counter intuitively to embrace boring media as a means of coping with the intensities of always on existence However if boredom is positioned in a digital network culture as a feeling that keeps driving us back to our social media feeds it is important to ask how else it might operate While the technological affordances of computational media have put pressure on our ability to conceive of boredom as a radical challenge to digital capitalism this book attempts to think about the potential that might still be embedded in boredom's capacity to temporarily suspend or to neutralize dominant structures of attention and affect Building on the work of Giorgio Agamben Byung Chul Han Roland Barthes and from historical accounts of boredom and entertainment the book provides a new understanding of boredom in the context of networked media
