Information Trapping Tara Calishain, 2007 How many times have you run a Google search that resulted in thousands of results? With over 8 billion pages online and more posted every day, the Web more than likely contains the information you're looking for if only you could find it. In this book, Internet search engine expert Tara Calishain makes researching more efficient and rewarding for anyone for whom the Web is an indispensable tool. She does so by teaching the latest techniques for building automated information gathering systems. From there, the sky's the limit. You'll see how to access your Gmail without having to check in at the site, create custom Gmail skins with CSS, build your own tools with APIs, get your mail via RSS feeds, use Gmail storage like a spare hard drive, use it as a blogging tool and more. Gmail is a hacker's dream. Offering more than two gigabytes of storage, an incredibly advanced JavaScript interface and a series of user interface innovations, it's proving to be one of the flagship applications on the Web. With this book, you can take control of this flagship, trick it out and use its capabilities in unconventional ways.
