Charles Alderson, 2006-11-01 This book addresses the need for tests that can diagnose the strengths and weaknesses in learners developing foreign language proficiency It presents the rationale for and research surrounding the development of DIALANG a suite of internet delivered diagnostic foreign language tests funded by the European Commission The word diagnosis is common in discussions in language education and applied linguistics but very few truly diagnostic tests exist However the diagnosis of foreign language proficiency is central to helping learners make progress This volume explores the nature of diagnostic testing emphasizing the need for a better understanding of the nature of appropriate diagnosis The book starts with a debate about how diagnostic testing might most appropriately be developed Charles Alderson argues that the field has neglected to construct diagnostic tests partly because other forms of testing have dominated the field Alderson examines how proficiency has been diagnosed in the key areas of language reading listening writing grammar and vocabulary The value of self assessment is discussed and exemplified as a key component in developing learners and teachers awareness of the complexity of language learning The book ends with a consideration of and recommendations for future developments in the diagnosis of foreign language proficiency *Form-focused Instruction and the Development of Second Language Development* Sible Johannes Andringa, 2005 *The Role of Second Language Proficiency in the Development of Second Language Reading Efficiency* Eynat Katz, 1997 This study examines the role of second language proficiency in learning to read fluently in a second language Sixty subjects were randomly sampled from a Hebrew Day School in Toronto Twenty children were in each of grades two four and six All children had English as their first language L1 and Hebrew as their second language L2 In each grade subjects were given parallel tasks in Hebrew and English reading isolated words and reading these same words in a text Accuracy and speed were measured by timing the subjects as they performed each of these tasks They were also administered parallel comprehension and oral cloze sentence tasks in each language in order to determine their level of language proficiency syntactic and semantic knowledge In general subjects in grade 2 and 4 had an advantage in their L1 on all measures The results indicated that by grade 6 however subjects no longer do significantly better in their L1 English on the accuracy speed and proficiency measures The importance

Advanced Proficiency and Exceptional Ability in Second Languages Kenneth Hyltenstam,2016 While the literature on second language acquisition and use is overwhelmingly rich with respect to initial and intermediate stages of development present knowledge of levels of ultimate attainment that are equal or close to that of native speakers has so far not been presented in a coherent manner This is what the present volume aims to achieve In addition to chapters that summarize what is currently known about the grammatical lexical and discourse features that continue to exhibit instability at the most advanced levels of second language development the volume presents overviews of the incipient research on two unique learner populations polyglots and employees in international call centres Polyglots defined as language users who are proficient in six or more second languages may be considered second language learners par excellence Call centre employees in economically less developed parts of the world are intriguing in how they cope with the high language

proficiency requirements of their job In conclusion this book is relevant for all readers both professionals and students interested in the development of second language theory For language teachers the book provides insights that are profitable in classrooms for advanced learners Reflecting on Proficiency from a Classroom Perspective June K. Phillips,1993
