Adsensory Financialisation

Pamela Odih, 2016-09-23 Adsensory technology presupposes a neoliberal entrepreneurial self as an integral feature of its biopolitical financialisation of healthcare regimes According to Michel Foucault neoliberalism is indebted to the endeavour of its self disciplined subjects investing human capital in a self regulated entrepreneurial pursuit of responsible healthcare and well being Primarily informed by social network analytics and virtual ethnographic observations this book identifies the biopolitical basis of adsensory technologies It argues that a paradoxical feature of adsensory technologies dissimulating that there is nothing Jean Baudrillard is the proliferation of risk This is because the dissimulation of nothing opens up the possibility that everything can be a risk in so far as the type of event it falls under can be treated according to the principles of insurance technology Francois Ewald Adsensory wearable technologies are called upon as a strategy of deterrence Jean Baudrillard to indemnify capitalism s production of signs which dissimulate their simulation In a context in which much that was certain now feigns its own existence the insurance professed by adsensory technologies provides for an unrealisable guarantee against indefinable unknowable risks Based also on case studies of European Court of Justice personal finance insurance rulings this book engages critically with the neoliberal construct of the entrepreneurial lifestyle insurance subject Social network analytics are utilised here to map bio technology onto neoliberal regimes of financialised well being and healthcare provision In so doing the book situates adsensory technologies within the marketising healthcare management programmes that are currently aligning the neoliberal reengineering of health and well being citizenship with the biopolitical healthcare financialisation of populations Paradoxically in their endeavour to actor network virtual well being health

communities adsensory technologies proliferate the individuating marketised conditions of neoliberal self regulating entrepreneurialism This gives rise to aleatory materialist dialectics of financialised surveillance far exceeding the regulatory time and space modalities of Foucauldian panoptics and Mathiesen synoptics Adsensory technologies are integral to a seismic transformation in the cultural economies of time presently eliding digital advertising and insurantal technologies Axiomatic with the synchronic times of the adsensory technologies valorised by lifestyle insurance much riskier asynchronic embodied times transgressively dissimilating the limits of financialisation are beginning to emerge      **Game Design**
