Chow, 2025-02-19 This book addresses the geopolitics and geoeconomics of technological rivalry between the world's two great powers the USA and China. It focuses on the semiconductor industry which, owing to its dual use in civilian and defence sectors, is critical to economic and national security interests. A diverse set of contributions from renowned scholars span wide-ranging topics to holistically analyze contemporary USA-China national security through a technological lens: the shifting trade and technology policy in the USA; the Chip 4 alliance as an industrial cartel; technology sanctions and the voice of high-tech industry in the USA; the race for digital sovereignty in the Gulf region and in Africa; Japan's grand strategy vis-à-vis semiconductors; a critical assessment of China's achievement on its self-sufficiency and effort in reducing its reliance on foreign supplies; the significance and the strategy of Taiwan's semiconductor in the future as well as how Taiwan can advance its national security through its status as a powerhouse of semiconductors; Korea's semiconductor policy in response to international technology rivalry; India's pursuit of semiconductors; and a close investigation of decoupling and hostility between the two great powers.
