Inventing the Cloud Century Marcus Oppitz, Peter Tomsu, 2017-08-03 This book combines the three dimensions of technology society and economy to explore the advent of today's cloud ecosystems as successors to older service ecosystems based on networks. Further, it describes the shifting of services to the cloud as a long-term trend that is still progressing rapidly. The book adopts a comprehensive perspective on the key success factors for the technology compelling business models and ecosystems, including private, public, and national organizations. The authors explore the evolution of service ecosystems, describe the similarities and differences, and analyze the way they have created and changed industries. Lastly, based on the current status of cloud computing and related technologies like virtualization, the Internet of Things, fog computing, big data, and analytics, cognitive computing, and blockchain, the authors provide a revealing outlook on the possibilities of future technologies, the future of the Internet, and the potential impacts on business and society. **Ethical**

**Hacking** Alana Maurushat, 2019-04-09 How will governments and courts manoeuvre within the boundaries of protected civil liberties in this new era of hacktivism? This monograph discusses moral and legal issues of ethical hacking and reviews analytics and trends. How will governments and courts protect civil liberties in this new era of hacktivism? Ethical Hacking discusses the attendant moral and legal issues. The first part of the 21st century will likely go down in history as the era when ethical hackers opened governments and the line of transparency moved by force. One need only read the motto we open governments on the Twitter page for Wikileaks to gain a sense of the sea change that has occurred. Ethical hacking is the non-violent use of a technology in pursuit of a cause, political or otherwise, which is often legally and morally ambiguous. Hacktivists believe in two general but spirited principles: respect for human rights and fundamental freedoms, including freedom of expression and personal privacy, and the responsibility of government to be open, transparent, and fully accountable to the public. How courts and governments will deal with hacking attempts which operate in a grey zone of the law, and where different ethical views collide, remains to be seen. What is undisputed is that Ethical Hacking presents a fundamental discussion of key societal questions. Published in English.

Practical R 4 Jon Westfall, 2020-06-30 Get started with an accelerated introduction to the R ecosystem programming language and tools, including R script and RStudio. Utilizing many examples and projects, this book teaches you how to get data into R and how to work with that data using R. Once grounded in the fundamentals, the rest of Practical R 4 dives into specific projects and examples, starting with running and analyzing a survey using R and LimeSurvey. Next, you'll carry out advanced statistical analysis using R and MouseLabWeb. Then you'll see how R can work for you without statistics, including how R can be used to automate data formatting, manipulation, reporting, and custom functions. The final part of this book discusses using R on a server; you'll build a script with R that can run an RStudio Server and monitor a report source for changes to alert the user when something has changed. This project includes both regular email alerting and push notification.

And finally you'll use R to create a customized daily rundown report of a person's most important information such as a weather report daily calendar to do's and more. This demonstrates how to automate such a process so that every morning the user navigates to the same web page and gets the updated report.

**What You Will Learn**

- Set up and run an R script including installation on a new machine and downloading and configuring R.
- Turn any machine into a powerful data analytics platform accessible from anywhere with RStudio Server.
- Write basic R scripts and modify existing scripts to suit your own needs.
- Create basic HTML reports in R inserting information as needed.
- Build a basic R package and distribute it.

**Investigating Online Heritage Crime** Damien Huffer, Evie Handby, 2025-12-01

From Reddit and YouTube to collector forums and live auctions, the avenues through which cultural heritage can be bought and sold are rapidly growing alongside new digital technologies. Considering anew the implications of this digital expansion for the online trafficking of cultural property and human remains, *Investigating Online Heritage Crime* conducts an exacting examination of these relatively under-researched sites of heritage crime. The chapters address how networks operate within and because of the interconnected social media and e-commerce landscape. Through doing so, this volume highlights where markets for online heritage are headed, especially given the ever-prevalent adoption of AI and LLM (Large Language Models) technology that is profoundly reshaping all aspects of online life, including licit and illicit commerce.

**Constructing Organizational Life** Thomas B. Lawrence, Nelson Phillips, 2019-07-02

Across the social sciences, scholars are increasingly showing how people work to construct organizational life, including the rules and routines that shape and enable organizational activity, the identities of people who occupy organizations, and the societal norms and assumptions that provide the context for organizational action. The idea of work emphasizes the ways in which people and groups engage in purposeful, reflexive efforts rooted in an awareness of organizational life as constructed in human interaction and changeable through human effort. Studies of these efforts have identified new forms of work, including emotion work, identity work, boundary work, strategy work, institutional work, and a host of others. Missing in these conversations, however, is a recognition that these forms of work are all part of a broader phenomenon driven by historical shifts that began with modernity and dramatically accelerated through the twentieth century. This book introduces the social symbolic work perspective, which addresses this broader phenomenon. The social symbolic work perspective integrates diverse streams of research to examine how people purposefully and reflexively work to construct organizational life, including the identities, technologies, boundaries, and strategies that constitute their organizations. In this book, the authors define social symbolic work and introduce three forms: self-work, organization work, and institutional work. Social symbolic work highlights people's efforts to construct the social world and focuses attention on the motivations, practices, resources, and effects of those efforts. This book explores eight distinct streams of social symbolic work research, drawing on a broad range of examples from the worlds of business, politics, sports, social movements, and many

others It provides researchers students and practitioners with an integrative theoretical framework useful in understanding social symbolic work a survey of the main forms of social symbolic work a rich set of theoretical opportunities to inspire new studies and practical methodological guidance for empirical research on social symbolic work      **Digital Innovations for Mass Communications** Paul Martin Lester, 2013-11-12 In every field of mass communications advertising entertainment studies journalism public relations radio television film tourism and visual reporting professionals understand the importance of storytelling Regardless of whether the finished product is a commercial an in depth investigative piece a public service campaign an independent documentary a travelogue or a collection of photographs effective storytelling requires a combination of creativity empathy and expertise Through the innovative technologies and techniques described in this textbook students will learn how to turn passive readers and viewers into engaged and regular users The sixteen chapters each include a brief introduction assignments simple to follow step by step exercises and sources for additional information in which users will learn to produce apps informational graphics quick response codes quizzes simulations smartphone and table icons social media campaigns three dimensional pictures and video Students will work with the following programs Blogger Dreamweaver Excel Facebook GeoCommons Google Maps Illustrator Imgur iMovie Infogram iShowU JavaScript JustGive Kaywa Kickstarter LinkedIn Onvert Photoshop Pixel Resort QuickTime Reddit Second Life SurveyMonkey TheAppBuilder Twitter Vizualize Wikipedia Word WordPress and YouTube When digital innovations are added to traditional print and screen presentations a media user is not only allowed to interact with the information but can also physically engage with the story displayed Giving students the tools they need to transform their storytelling in this manner is the ultimate goal of this textbook      **Readings in the Technology of Industry** William Norman Mitchell, 1929      **Info exam** ,2007
