reconstructs the value creation system of enterprise manufacturing as its core thread. The book is committed to three major research objectives: first, breaking through the limitations of traditional paradigms; second, analyzing institutional innovations for digital trade; third, proposing actionable strategies for global competitiveness. This book integrates institutional shifts and global value chains to propose a policy technology market synergistic evolution model, demonstrating their self-reinforcing cycle. Policy guidance drives technological investment, technology enhances market competitiveness, market feedback optimizes policies. The book establishes a research framework encompassing environment mechanism application prospect, culminating in an analytical model of technology penetration, institutional adaptation, global governance. This model not only addresses cutting-edge theories in the digital economy but also aligns with China's manufacturing sector in its transition from a manufacturing giant to a manufacturing powerhouse, thereby establishing a robust foundation for industrial advancement.

Artificial Intelligence in Health Marianne Sarazin, 2024-03-26. Undeniable, inescapable, exhilarating, and breaking free from the exclusive domain of science, artificial intelligence has become our main preoccupation. A major generator of new mathematical thinking, AI is the result of easy access to information and data as facilitated by computer technology. Big Data has come to be seen as an unlimited source of knowledge, the use of which is still being fully explored, but its industrialization has swiftly followed in the footsteps of mathematicians. Today's tools are increasingly designed to replace human beings, which comes with social and philosophical consequences. Drawing on examples of scientific work and the insights of experts, this book offers food for thought on the consequences and future of AI technology in education, health, the workplace, and aging.
