*Surgical Assistants*, 2004      Propaganda in the Helping Professions Eileen Gambrill, 2012-02-20 Propaganda in the helping professions has grown by leaps and bounds in recent decades with alarming implications for clients and their families as well as the professionals who try to help them There is a fog that has been generated by corporate interests and organizations attempting to sell their services and products to desperate or poorly educated consumers Propaganda in the Helping Professions is a guide to lifting the confusion From phrenology to institutional crib beds for adult psychiatric patients from Roman bird beak masks to drugs designed to combat overurination readers are taken on a tour across the centuries of egregious practices of professionals and quacks including the present day medicalization of our lives The author one of the field s most relentless critics of fads phonies and fallacies shows readers how to think critically about both research and advertising in order to deliver effective services to clients and not be bamboozled by bogus claims about alleged problems risks and remedies Incisive interesting eminently readable and passionately argued this book places responsibility for client well being both on consumers to raise questions and on the professionals who claim to help them to accurately answer them
