*Structure of Materials* Marc De Graef, Michael E. McHenry, 2012-10-08 A new edition of the highly readable textbook applying the fundamentals of crystallography symmetry and diffraction to a range of materials *The New Science of Strong Materials* J E Gordon, 1991-03-28 Why isn't wood weaker than it is Why isn't steel stronger Why does glass sometimes shatter and sometimes bend like spring Why do ships break in half What is a liquid and is treacle one All these are questions about the nature of materials All of them are vital to engineers but also fascinating as scientific problems During the 250 years up to the 1920s and 1930s they had been answered largely by seeing how materials behaved in practice But materials continued to do things that they ought not to have done Only in the last 40 years have these questions begun to be answered by a new approach Material scientists have started to look more deeply into the make up of materials They have found many surprises above all perhaps that how a material behaves depends on how perfectly or imperfectly its atoms are arranged Using both SI and imperial units Professor Gordon's account of material science is a demonstration of the sometimes curious and entertaining ways in which scientists isolate and solve problems **A Collection of Technical Papers: Structures and materials**, 1987 **Smith and Hogan Criminal Law: Text and Materials** David Ormerod, John Cyril Smith, Karl Laird, 2014 Criminal Law is written with the needs of the student foremost in mind to provide more than ever as modern and as comprehensive an exposition of the criminal law as he or she could possibly require **The structure and properties of materials** John Wulff, 1979 **Nuclear Science Abstracts**, 1975 NSA is a comprehensive collection of international nuclear science and technology literature for the period 1948 through 1976 pre dating the prestigious INIS database which began in 1970 NSA existed as a printed product Volumes 1-33 initially created by DOE's predecessor the U S Atomic Energy Commission AEC NSA includes citations to scientific and technical reports from the AEC the U S Energy Research and Development Administration and its contractors plus other agencies and international organizations universities and industrial and research organizations References to books conference proceedings papers patents dissertations engineering drawings and journal articles from worldwide sources are also included Abstracts and full text are provided if available **Journal of the Institute of Metals** Institute of Metals, 1928 Issues for Sept 1951 include the Bulletin **Catalog of Copyright Entries.
