Essentials for Struggling Learners John J. Hoover, 2009-01-13 Effective and ongoing assessment processes are crucial for making important decisions about the education of at-risk and struggling students. This practical book presents K-12 educators with a comprehensive overview of the three primary types of assessment within multitiered Response to Intervention (RTI) models: universal screening, progress monitoring, and diagnostic assessment for special education. This resource establishes the foundation for assessment in RTI and provides practical suggestions for implementing universal screening and progress monitoring to make informed instructional decisions. The author identifies the role of RTI in determining student eligibility for special education services and discusses effective assessment decision-making processes, including roles and responsibilities of different team members. Intervention Austin Buffum, Mike Mattos, Chris Weber, 2011-10-29 The sequel to Pyramid Response to Intervention advocates that a successful RTI model begins by asking the right questions to create a fundamentally effective learning environment for every student. RTI is not a series of implementation steps but rather a way of thinking. Understand why bureaucratic paperwork-heavy compliance-oriented test score-driven approaches fail. Then learn how to create a focused RTI model that works. **Assessment in Special Education** Roger Pierangelo, George A. It provides future special educators comprehensive coverage of the latest tests and evaluation procedures for all areas of exceptionality for every age group for students with mild, moderate, and severe disabilities.
