The part that science plays in modern life is so vital that science teaching must inevitably have an important place in the school curriculum. There has been some confusion regarding the term to be used to cover the work in science in the elementary school. Nature study has been the word in most common usage. But there is considerable misunderstanding as to what is included under this term. In recent years it has been used in an ever broadening sense till now the word is used by many educators to include all phases of science adapted to the elementary school. But among people in general the common notion still prevails that nature study includes only the study of Wild plants and animals. So that considering all sides of the matter it has seemed better to the author to adopt the word science instead of nature study as tending to involve less misunderstanding and as helping to establish an appropriate and standard term.
