Why Mothers Kill Geoffrey R. McKee, 2015 This title uses more than a dozen case studies to help us understand and most importantly prevent crimes where a mother murders her child It applies current research findings to analyse explain and suggest practical interventions to alter the personal familial and situational circumstances that may influence some mothers to kill With an emphasis on prevention it sets out specific strategies that might have been employed at various risk intervention points occurring before the child s death Through the use of extended narratives the resource brings to life the thoughts and emotions experienced by women in each of the five categories of mothers the author has identified from his years of practice

When Mothers Kill Cheryl L. Meyer, Michelle Oberman, 2008-06-01 Winner of the 2008 Outstanding Book Award by the Academy of Criminal Justice Sciences Michelle Oberman and Cheryl L Meyer don t write for news magazines or prime time investigative television shows but the stories they tell hold the same fascination *When Mothers Kill* is compelling In a clear direct fashion the authors recount what they have learned from interviewing women imprisoned for killing their children Readers will be shocked and outraged as much by the violence the women have endured in their own lives as by the violence they engaged in but they will also be informed and even enlightened Oberman and Meyer are leading authorities on their subject Their 2001 book *Mothers Who Kill Their Children* drew from hundreds of newspaper articles as well as from medical and social science journals to propose a comprehensive typology of maternal filicide In that same year driven by a desire to test their typology and to better understand child killing women not just as types but as individuals Oberman and Meyer began interviewing women who had been incarcerated for the crime After conducting lengthy face to face interviews with forty prison inmates they returned and selected eight women to speak with at even greater length This new book begins with these stories recounted in the matter of fact words of the inmates themselves There are collective themes that emerge from these individual accounts including histories of relentless interpersonal violence troubled relationships with parents particularly with mothers twisted notions of romantic love and deep conflicts about motherhood These themes structure the books overall narrative which also includes an insightful examination of the social and institutional systems that have failed these women Neither the mothers nor the authors offer these stories as excuses for these crimes

100 Years of the Infanticide Act Karen Brennan, Emma Milne, 2023-10-19 This book provides the first comprehensive and detailed analysis of the Infanticide Act and its impact in

England and Wales and around the world It is 100 years since an Infanticide Act was first passed in England and Wales The statute re enacted in 1938 allows for leniency to be given to women who kill their infants within the first year of life This legislation is unique and controversial it creates a specific offence and defence that is available only to women who kill their biological infants Men and other carers are not able to avail of the special mitigation provided by the Act nor are women who kill older children The collection brings together leading experts in the field to offer important insights into the history of the law how it works today the impact and legacy of the statute and potential futures of infanticide laws around the world Contributors consider the Act in practice in England and Wales the ways it has been portrayed in the British media and justifications for and criticisms of the provision of special treatment for women who kill their infants within a year of birth It also looks at the criminal justice responses to infanticide in other jurisdictions such as Australia Ireland Sweden and the United States of America [Dangerous Women](#) Larry A. Morris,2010-10-04 Though men are still most often the perpetrators of violent assault and child molestation more girls and women are becoming dangerous criminals Blending humanity with scientific rigor this book draws readers into the direct experiences of this alarming new demographic

Mallicoat,2011-12-05 Women and Crime A Text Reader part of the text reader series in criminology and criminal justice incorporates contemporary and classic readings some including policy implications accompanied by student friendly authored text This unique format provides a theoretical framework and context for students The comprehensive coverage of the book includes the history and theories of female offending offenders and their crimes processing and sentencing of female offenders women in prison women and victimization women and work in the criminal justice system juveniles and crime and international crime Race and diversity will be an underlying theme throughout the text [New Books on Women and Feminism](#) ,2007 [American Book Publishing Record](#) ,2006 *Abortion Counseling* Rachel B. Needle,Lenore Walker, EdD,2008 The majority of women who have had abortions report feeling happy satisfied and relieved following their abortion Some few women who have had an abortion may experience some feelings of guilt and sadness however this rarely lasts longer than a few days Those very few women who present with prolonged feelings of

sadness and mental health problems are women who have either had these problems prior to their abortion had other risk factors or were influenced by frightening demonstrations and inaccurate biased information provided prior to the abortion Through this book the authors hope to train general therapists and counselors in pre and post abortion counseling techniques to avoid women experiencing unnecessary psychological problems created by those who insist that the non existent post abortion syndrome exists Abortion counseling has a critical role to play in ensuring women s mental health is the priority and not the goals of a political agenda Thus Needle and Walker have taken on a complex profound and essential task equipping therapists and abortion counselors with the knowledge and skills needed to help their clients and they have done it well Readers of this book should gain an increased understanding of how women s diverse life circumstances affect their ability to cope with the difficult decisions and circumstances surrounding abortion They will also be better able to build women s resilience and coping skills by having considered them both in the context of women s lives e g coping resources social support partner violence incidence of depression and in the context of socio political agendas that seek to manipulate women s mental health in order to undermine women s reproductive rights In the final analysis it is important to remember that abortion counseling is not about abortion it is about women confronting the decision to bear a child with all of the profound and life changing commitments and responsibilities that entails From the Foreword by Nancy Felipe Russo PhD Regents Professor of Psychology Arizona State University Internationale Bibliographie der Rezensionen wissenschaftlicher Literatur ,2007 **Kaapse bibliotekaris** ,2005 Issues for Nov 1957 include section Accessions Aanwinste Sept 1957

Infanticide and Filicide Gina Wong, Ph.D.,George Parnham, J.D.,2020-12-09 Maternal filicide the killing of a child by the mother is not a new phenomenon Evidence of mothers killing their infants dates back to at least 2000 B C E and the ancient Chaldean civilization The trial of Andrea Yates in 2001 for drowning her five children however captured the public attention in a way few similar cases had before Initially met with public shock and outrage the Yates case also spotlighted postpartum psychosis and maternal mental health forensics the intersection of maternal mental illness and the criminal justice system Coedited by George Parnham the attorney who successfully defended Yates this book includes his narrative account of how he first heard about and came to take on the case It also features real case examples from more than 30 experts in the field representing eight countries In addition the book includes a chapter on paternal filicide an important subject that receives far too little attention in the literature Firmly rooted in research thorough in its description of theory and packed with practical applications this volume highlights the necessary competency areas for those involved in maternal mental health forensics whether psychologists psychiatrists social workers or lawyers *Who's who in the West* ,1987 Women Who Kill Lenore Walker,David Shapiro,Amanda Temares,Brandi Diaz,2024-10-11 Women rarely kill How and why a woman can be driven to lethal action is often highly complex and misunderstood Many of these women who act lethally are driven to such a point as a last resort following prolonged experiences of child abuse and or domestic violence This book offers insights into

these women detailing their motivations their patterns of violence and how they can be aided through psychological evaluation and proper expert testimony The chapters in this volume also include discussions of women who did not kill but were punished as if they had This collection of writings seeks to fill the gaps in research on women who kill This book is beneficial to students and researchers of Psychology including Forensic Psychology It will further aid the field of criminal justice as well as policymakers such that clinicians can provide an enhanced understanding on various psychological and demographic factors which contribute to situations where battered women reach a point where the only option to ensure survival is lethal self defense Finally this book offers clarity as it points out the areas in which the legal system has failed these women The chapters in this book were originally published as a special issue of Journal of Aggression Maltreatment Trauma
