AI and Civic Engagement Torrey Trust, Robert W. Maloy, 2025-11-25 Integrate generative AI technologies into your teaching with activities and prompts designed to engage students in civic learning to become adaptable critical thinkers in a time of ongoing change. Many students have become disinterested and disengaged from politics and what's happening in their communities. To ignite interest and activate engagement in civics, students need to learn how to analyze current events, make informed decisions, think and act democratically and participate locally, nationally and globally as engaged citizens. Generative AI GenAI technologies which are transforming every aspect of modern life can support and enrich civic learning in ways that were never before possible. With this practical guide, you'll discover how to integrate GenAI technologies into civic learning across all grade levels and in many different subject areas including math, English language arts, engineering, science, computer science, history, social studies, music and art. This book features 28 learning plans that connect with the ISTE Student Standards, each with multiple interactive activities and example prompts to support students in engaging with GenAI tools as active citizens and critical investigators of the capacities and risks of these technologies. The book offers more than 75 interactive activities and 90 example GenAI prompts to foster meaningful, exciting and engaged learning. Shows how to teach with and about GenAI technologies to enhance civic learning. Explores dozens of educational and public policy issues that students will find relevant to their lives and futures. Expands student learning about diversity and inclusion in every chapter. Integrates GenAI into activities in ways that support and extend, not replace, teaching and learning. As students and teachers begin using GenAI tools to learn about civic issues and public policy topics that matter to them, they become more informed civic learners and more knowledgeable technology users. This book is devoted to making that crucial teaching and learning happen. Audience: Elementary and secondary teachers across various disciplines including social studies, STEM fields and the English language arts.

Staying Human in an Era of Artificial Intelligence Joseph Vukov, 2024-06-20 AI poses a real and present danger. It contains the capacity to amplify social problems, drive a wedge further into our already polarized society, and sow seeds of distrust in communities and personal relationships. When approached without a robust sense of human dignity, AI also threatens to undermine our self-understanding. To a degree beyond any previous technology, AI can make us forget ourselves. In this new era of AI, we must consciously make a choice to stay human. In this book, I provide a map and the tools for doing just that. From the author, Joseph Vukov.
