**The New Mathematical Coloring Book** Alexander Soifer, 2024-03-11 The New Mathematical Coloring Book TNMCB includes striking results of the past 15 year renaissance that produced new approaches advances and solutions to problems from the first edition A large part of the new edition Ask what your computer can do for you presents the recent breakthrough by Aubrey de Grey and works by Marijn Heule Jaan Parts Geoffrey Exoo and Dan Ismailescu TNMCB introduces new open problems and conjectures that will pave the way to the future keeping the book in the center of the field TNMCB presents mathematics of coloring as an evolution of ideas with biographies of their creators and historical setting of the world around them and the world around us A new thing in the world at the time TMCB I is now joined by a colossal sibling containing more than twice as much of what only Alexander Soifer can deliver an interweaving of mathematics with history and biography well seasoned with controversy and opinion Peter D Johnson Jr Auburn University Like TMCB I TMCB II is a unique combination of Mathematics History and Biography written by a skilled journalist who has been intimately involved with the story for the last half century The nature of the subject makes much of the material accessible to students but also of interest to working Mathematicians In addition to learning some wonderful Mathematics students will learn to appreciate the influences of Paul Erdős Ron Graham and others Geoffrey Exoo Indiana State University The beautiful and unique Mathematical coloring book of Alexander Soifer is another case of good mathematics containing a lot of similar examples it is not by chance that Szemerédi's Theorem story is included as well and presenting mathematics as both a science and an art Peter Mihk Mathematical Reviews MathSciNet A postman came to the door with a copy of the masterpiece of the century I thank you and the mathematics community should thank you for years to come You have set a standard for writing about mathematics and mathematicians that will be hard to match Harold W Kuhn Princeton University I have never encountered a book of this kind The best description of it I can give is that it is a mystery novel I found it hard to stop reading before I finished in two days the whole text Soifer engages the reader's attention not only mathematically but emotionally and esthetically May you enjoy the book as much as I did Branko Grünbaum University of Washington I am in absolute awe of your 2008 book Aubrey D N J de Grey LEV Foundation [The Mathematical Coloring Book](#) Alexander Soifer, 2008-10-13 This is a unique type of book at least I have never encountered a book of this kind The best description of it I can give is that it is a mystery novel developing on three levels and imbued with both educational and philosophical moral issues If this summary description does not help understanding the particular character and allure of the book possibly a more detailed explanation will be found useful One of the primary goals of the author is to interest readers in particular young mathematicians or possibly pre mathematicians in the fascinating world of elegant and easily understandable problems for which no particular mathematical knowledge is necessary but which are very far from being easily solved In fact the prototype of such problems is the following If each point of the plane is to be given a color how many colors do we need if every two

points at unit distance are to receive distinct colors More than half a century ago it was established that the least number of colors needed for such a coloring is either 4 or 5 or 6 or 7 Well which is it Despite efforts by a legion of very bright people many of whom developed whole branches of mathematics and solved problems that seemed much harder not a single advance towards the answer has been made This mystery and scores of other similarly simple questions form one level of mysteries explored In doing this the author presents a whole lot of attractive results in an engaging way and with increasing level of depth
