Asian Interventions in Global Shakespeare Poonam Trivedi, Paromita Chakravarti, Ted Motohashi, 2020-11-16 This volume critically analyses and theorises Asian interventions in the expanding phenomenon of Global Shakespeare It interrogates Shakespeare's universality from

Asian perspectives how this has been modified or even replaced by the global bard as a recognisable brand and how Asian Shakespeares have contributed to or subverted this process by both facilitating the worldwide dissemination of the bard's plays and challenging and resisting the very templates through which they become globally legible. Critically acclaimed Asian productions have prominently figured at premier Western festivals and popular Asian appropriations like Bollywood, manga and anime have created new kinds of globally accessible Shakespeare. Essays in this collection engage with the emergent critical issues, the efficacy of definitions of the local, global, transnational and cosmopolitan and of the liminalities and mobilities in between. They further examine the politics of West and East, the evolving markers of the Asian and the equation of the global with the Asian, they attend to performance and archiving protocols and bring the current debates on translation, appropriation and world literature to speak to the concerns of global and transnational Shakespeare. These investigations analyse recent innovative Asian theatre productions, popular cinematic and manga appropriations and the increasing presence of Shakespeare in the Asian digital sphere. They provide an Asian standpoint and lens in rereading the processes of cultural globalisation and the mobilisation of Shakespeare.

,2002 **Wired Shut** Tarleton Gillespie,2007 While the public and the media have been distracted by the story of Napster warnings about the evils of piracy and lawsuits by the recording and film industries the enforcement of copyright law in the digital world has quietly shifted from regulating copying to regulating the design of technology Lawmakers and commercial interests are pursuing what might be called a technical fix instead of specifying what can and cannot be done legally with a copyrighted work this new approach calls for the strategic use of encryption technologies to build standards of copyright directly into digital devices so that some uses are possible and others rendered impossible In Wired Shut Tarleton Gillespie examines this shift to technical copy protection and its profound political economic and cultural implications Gillespie reveals that the real story is not the technological controls themselves but the political economic and cultural arrangements being put in place to make them work He shows that this approach to digital copyright depends on new kinds of alliances among content and technology industries legislators regulators and the courts and is changing the relationship between law and technology in the process The film and music industries he claims are deploying copyright in order to funnel digital culture into increasingly commercial patterns that threaten to undermine the democratic potential of a network society In this broad context Gillespie examines three recent controversies over digital copyright the failed effort to develop copy protection for portable music players with the Strategic Digital Music Initiative SDMI the encryption system used in DVDs and the film industry s legal response to the tools that challenged them and the attempt by the FCC to mandate the broadcast flag copy protection system for digital television In each he argues that whether or not such technical constraints ever succeed the political alignments required will profoundly shape the future of cultural expression in a digital age **Consuming Religion** Vincent Jude Miller,2004 Terrence W Tilley University of Dayton [Virtual Identities and Digital Culture](#) Victoria Kannen,Aaron Langille,2023-02-28 Virtual Identities and Digital Culture investigates how our online identities and cultures are embedded within the digital practices of our lives exploring how we form community how we play and how we re imagine traditional media in a digital world The collection explores a wide range of digital topics from dating apps microcelebrity and hackers to auditory experiences Netflix algorithms and live theatre online and builds on existing work in digital culture and

identity by bringing new voices contemporary examples and highlighting platforms that are emerging in the field The book speaks to the modern reality of how our digital lives have been forever altered by our transnational experiences one of those key experiences is the pandemic but so too is systemic inequality questions of digital privacy and the role of joy in our online lives A vital contribution at a time of significant social and cultural flux this book will be highly relevant to those studying digital culture within media communication cultural studies digital humanities and sociology departments **Paperbound**
