Design and the Digital Humanities Stan Ruecker, **Digital Humanities** David M. Berry, Anders Fagerjord, 2017-05-30

As the twenty first century unfolds computers challenge the way in which we think about culture society and what it is to be human areas traditionally explored by the humanities In a world of automation Big Data algorithms Google searches digital archives real time streams and social networks our use of culture has been changing dramatically The digital humanities give us powerful theories methods and tools for exploring new ways of being in a digital age Berry and Fagerjord provide a compelling guide exploring the history intellectual work key arguments and ideas of this emerging discipline They also offer an important critique suggesting ways in which the humanities can be enriched through computing but also how cultural critique can transform the digital humanities Digital Humanities will be an essential book for students and researchers in this new field but also related areas such as media and communications digital media sociology informatics and the humanities more broadly

The Emergence of the Digital Humanities Steven Edward Jones, 2014 The past decade has seen a profound shift in our collective understanding of the digital network What was once understood to be a transcendent virtual reality is now experienced as a ubiquitous grid of data that we move through and interact with every day raising new questions about the social locative embodied and object oriented nature of our experience in the networked world In *The Emergence of the Digital Humanities* Steven E Jones examines this shift in our relationship to digital technology and the ways that it has affected humanities scholarship and the academy more broadly Based on the premise that the network is now everywhere rather than merely out there Jones links together seemingly disparate cultural events the essential features of popular social media the rise of motion control gaming and mobile platforms the controversy over the gamification of everyday life the spatial turn fabrication and 3D printing and electronic publishing and argues that cultural responses to changes in technology provide an essential context for understanding the emergence of the digital humanities as a new field of study in

this millennium [Digital Humanities and Material Religion](#) Emily Suzanne Clark,Rachel McBride Lindsey,2022-04-04 Building from a range of essays representing multiple fields of expertise and traversing multiple religious traditions this important text provides analytic rigor to a question now pressing the academic study of religion what is the relationship between the material and the digital Its chapters address a range of processes of mediation between the digital and the material from a variety of perspectives and sub disciplines within the field of religion in order to theorize the implications of these two turns in scholarship offer case studies in methodology and reflect on various tools and processes Authors attend to religious practices and the internet digital archives of religion decolonization embodiment digitization of religious artefacts and objects and the ways in which varied relationships between the digital and the material shape religious life Collectively the volume demonstrates opportunities and challenges at the intersection of digital humanities and material religion Rather than defining the bounds of a new field of inquiry the essays make a compelling case collectively and on their own for the interpretive scrutiny required of the humanities in the digital age [Cultural Heritage Infrastructures in Digital Humanities](#) Agiatis Benardou,Erik Champion,Costis Dallas,Lorna Hughes,2017-09-22 What are the leading tools and archives in digital cultural heritage How can they be integrated into research infrastructures to better serve their intended audiences In this book authors from a wide range of countries representing some of the best research projects in digital humanities related to cultural heritage discuss their latest findings both in terms of new tools and archives and how they are used or not used by both specialists and by the general public [A New Companion to Digital Humanities](#) Susan Schreibman,Ray Siemens,John Unsworth,2015-11-12 This highly anticipated volume has been extensively revised to reflect changes in technology digital humanities methods and practices and institutional culture surrounding the valuation and publication of digital scholarship A fully revised edition of a celebrated reference work offering the most comprehensive and up to date collection of research currently available in this rapidly evolving discipline Includes new articles addressing topical and provocative issues and ideas such as retro computing desktop fabrication gender dynamics and globalization Brings together a global team of authors who are pioneers of innovative research in the digital humanities Accessibly structured into five sections exploring infrastructures creation analysis dissemination and the future of digital humanities Surveys the past present and future of the field offering essential research for anyone interested in better understanding the theory methods and application of the digital humanities [On Making in the Digital Humanities](#) Julianne Nyhan,Geoffrey Rockwell,Stéfan Sinclair,Alexandra Ortolja-Baird,2023-03-13 A collection that explores the processes of making within the digital humanities On Making in the Digital Humanities fills a gap in our understanding of digital humanities projects and craft by exploring the processes of making as much as the products that arise from it Focusing on the interwoven layers of human and technological textures that constitute digital humanities scholarship it assembles a group of well known experienced and emerging scholars in the digital humanities to reflect on various forms of making The chapters gathered here are individually important but together

provide a very human view of what it is to do the digital humanities in the past present and future This book will accordingly be of interest to researchers teachers and students of the digital humanities creative humanities including maker spaces and culture information studies the history of computing and technology and the history of science and the humanities

The Datafied Society Mirko Tobias Schäfer,Karin Es,2025-10-01 As machine readable data comes to play an increasingly important role in everyday life researchers find themselves with rich resources for studying society The novel methods and tools needed to work with such data require not only new knowledge and skills but also a new way of thinking about best research practices This book critically reflects on the role and usefulness of big data challenging overly optimistic expectations about what such information can reveal introducing practices and methods for its analysis and visualisation and raising important political and ethical questions regarding its collection handling and presentation

The Routledge Research Companion to the Medieval Icelandic Sagas Ármann Jakobsson,Sverrir Jakobsson,2017-02-17 The last fifty years have seen a significant change in the focus of saga studies from a preoccupation with origins and development to a renewed interest in other topics such as the nature of the sagas and their value as sources to medieval ideologies and mentalities The Routledge Research Companion to the Medieval Icelandic Sagas presents a detailed interdisciplinary examination of saga scholarship over the last fifty years sometimes juxtaposing it with earlier views and examining the sagas both as works of art and as source materials This volume will be of interest to Old Norse and medieval Scandinavian scholars and accessible to medievalists in general

Modelling Between Digital and Humanities Arianna Ciula,Øyvind Eide,Cristina Marras,Patrick Sahle,2023-12-15 This volume presents an exploration of Digital Humanities DH a field focused on the reciprocal transformation of digital technologies and humanities scholarship Central to DH research is the practice of modelling which involves translating intricate knowledge systems into computational models This book addresses a fundamental query How can an effective language be developed to conceptualize and guide modelling in DH Modelling with its historical roots carries multifaceted meanings influenced by various disciplinary contexts Modelling Between Digital and Humanities innovatively connects DH with the historical tradition of model based thinking in the humanities cultural studies and the sciences It endeavors to reshape interpretative frameworks by contextualizing DH s modelling practices within a broader conceptual landscape Through an exploration of digital visual and data models the book asserts that DH holds the potential to be a cornerstone of a novel cultural literacy paradigm By probing the interplay between technology and thought the book ultimately positions DH as a catalyst for transformative cultural insights

modeling in the humanities and a grounding in the technical concepts necessary to understand and engage with the second part of the book. The second part of the book is a wide ranging exploration of topics central for a deeper understanding of data modeling in digital humanities. Chapters cover data modeling standards and the role they play in shaping digital humanities practice, traditional forms of modeling in the humanities and how they have been transformed by digital approaches, ontologies which seek to anchor meaning in digital humanities resources and how data models inhabit the other analytical tools used in digital humanities research. It concludes with a glossary chapter that explains specific terms and concepts for data modeling in the digital humanities context. This book is a unique and invaluable resource for teaching and practising data modeling in a digital humanities context.

The Digital Humanities and the Digital Modern James Smithies, 2017-08-28

This book provides new critical and methodological approaches to digital humanities intended to guide technical development as well as critical analysis. Informed by the history of technology and culture and new perspectives on modernity, Smithies grounds his claims in the engineered nature of computing devices and their complex entanglement with our communities, our scholarly traditions and our sense of self. The distorting mentalit of the digital modern informs our attitudes to computers and computationally intensive research, leading scholars to reject articulations of meaning that admit the interdependence of humans and the complex socio technological systems we are embedded in. By framing digital humanities with the digital modern, researchers can rebuild our relationship to technical development and seek perspectives that unite practical and critical activity. This requires close attention to the cyber infrastructures that inform our research, the software intensive methods that are producing new knowledge and the ethical issues implicit in the production of digital humanities tools and methods. The book will be of interest to anyone interested in the intersection of technology with humanities research and the future of digital humanities.
