**Photography** ,1893      **Repetition and Identity** Catherine Pickstock,2013-10-03 The Literary Agenda is a series of short polemical monographs about the importance of literature and of reading in the wider world and about the state of literary education inside schools and universities The category of the literary has always been contentious What is clear however is how increasingly it is dismissed or is unrecognised as a way of thinking or an arena for thought It is sceptically challenged from within for example by the sometimes rival claims of cultural history contextualized explanation or media studies It is shaken from without by even greater pressures by economic exigency and the severe social attitudes that can follow from it by technological change that may leave the traditional forms of serious human communication looking merely antiquated For just these reasons this is the right time for renewal to start reinvigorated work into the meaning and value of literary reading Repetition and Identity offers a theory of the existing thing as such A thing only has identity and consistency when it has already been repeated but repetition summons difference and the shadow invocation of a connecting sign In contrast to the perspectives of Post structuralism Catherine Pickstock proposes that signs are part of reality and that they truthfully express the real She also proposes that non identical repetition involves analogy rather than the Post structuralist

combination of univocity and equivocity or of rationalism with scepticism This proposal which is happy for reality to make sense involves however a subjective decision which is to be poetically performed A wager is laid upon the possibility of a consistency which sustains the subject in continuity with the elusive consistency of nature This wager is played out in terms of a performative argument concerning the existential stances open to human beings It is concluded that the individual sustains this quest within the context of an inter subjective search for an historical consistency of culture But can ethical consistency and the harmonisation of this with an aesthetic surplus of an elsewhere invoked by the sign be achieved without a religious gesture And can this gesture avoid a tragic tension between ethical commitment and religious renunciation Pickstock suggests a Kierkegaardian re reading of the Patristic categories of recapitulation and reconstitution can reconcile this tension The quest for the identity and consistency of the thing leads us from the subject through fiction and history and to sacred history to shape an ontology which is also a literary theory and a literary artefaction
