### **Green Business Process Management**

**Management** Jan vom Brocke, Stefan Seidel, Jan Recker, 2012-06-15. *Green Business Process Management: Towards the Sustainable Enterprise* consolidates the global state of the art knowledge about how business processes can be managed and improved in light of sustainability objectives. Business organizations, a dominant part of our society, have always been a major contributor to the degradation of our natural environment through the resource consumption, greenhouse emissions, and wastage production associated with their business processes. In order to lessen their impact on the natural environment, organizations must design and implement environmentally sustainable business processes. Finding solutions to this organizational design problem is the key challenge of Green Business Process Management. This book discusses the emerging challenges of designing green business processes, presents tools and methods that organizations can use in order to design and implement environmentally sustainable processes, and provides insights from cases where organizations successfully engaged in more sustainable business practices. The book is of relevance to both practitioners and academics who are interested in understanding designing and implementing green business processes. It also constitutes a valuable resource for students and lecturers in the fields of information systems management and sustainable development.
