

1. The nervous system is the part of the body that controls and coordinates all the activities that require voluntary action. It is made up of the brain, spinal cord, and nerves.

2. The brain is the central part of the nervous system. It is located in the head and is responsible for processing information from the senses and controlling the body's movements.

3. The spinal cord is a long, thin, tube-like structure that runs from the base of the brain down to the lower back. It is responsible for transmitting signals between the brain and the rest of the body.

4. Nerves are bundles of fibers that carry messages between the brain and the rest of the body. They are found throughout the body, including in the arms, legs, and internal organs.
