**Contemporary British Fiction** Nick Bentley, 2017-11-15 This essential guide provides a comprehensive survey of the most important debates in the criticism and research of contemporary British fiction. Exploring experiments with literary form, this authoritative book considers cutting edge concerns relating to the neo-historical novel, the relationship between literature and science, literary geographies and trauma narratives. Engaging with key literary theories and identifying present trends and future directions in the literary criticism of contemporary British fiction, this is an invaluable resource for undergraduate and postgraduate students of English literature, teachers, researchers and scholars.

*Subject Guide to Books in Print*, 2001

Understanding Julian Barnes Merritt Moseley, 2009-08-31 Evaluating the whole of Barnes's canon, Moseley describes the novelist's admiration for Gustave Flaubert, which is most notably apparent in his fourth novel, Flaubert's Parrot. He identifies his technical and thematic concerns and explores his divided career as a writer of serious novels published under his own name and of detective thrillers published under the pseudonym Dan Kavanagh.

America and the Americans in Postwar British Fiction Stephan-Alexander Ditze, 2006 National images have been firmly established in western literatures since classical antiquity. Since the seventeenth century, these images have made an impact on the reception of the literary works in question and have influenced the production of later generations of writers. Despite this early interest of artists in national images, it was not until the early twentieth century that such images were addressed by literary scholarship.

However, imagology, a branch of Comparative and General Literature, is still marked by a widespread terminological incoherence. The present study wants to help eliminate this deficit. To this end, the basic notions image and stereotype are unambiguously defined and made applicable for practical criticism by using the newly coined concept of imagene and a structuralist model of images. The explanatory power of the conceptual framework proposed is demonstrated by in-depth analyses of five British novels of the second half of the twentieth century, which focus on the United States of America and its inhabitants.

**Novel Style** Ben Masters, 2017-12-08 We live in a time of linguistic plainness. This is the age of the tweet and the internet meme, the soundbite, the status, the slogan. Everything reduced to its most basic components. Stripped back. Pared down. Even in the

world of literature where we might hope to find some linguistic luxury we are flirting with a recessionary mood Big books abound but rhetorical largesse at the level of the sentence is a shrinking economy There is a prevailing minimalist sensibility in the twenty first century Novel Style is driven by the conviction that elaborate writing opens up unique ways of thinking that are endangered when expression is reduced to its leanest possible forms By re examining the works of essential English stylists of the late twentieth century Anthony Burgess Angela Carter Martin Amis as well as a newer generation of twenty first century stylists Zadie Smith Nicola Barker David Mitchell Ben Masters argues for the ethical power of stylistic flamboyance in fiction and demonstrates how being a stylist and an ethicist are one and the same thing A passionate championing of elaborate writing and close reading Novel Style illuminates what it means to have style and how style can change us
