Higher Education for Democratic Innovation

Sjur Bergan,Tony Gallagher,Ira Harkavy,2015 Democracy is increasingly the standard against which societies are measured The term democratic culture designates the set of attitudes and behaviours that citizens need to have for democratic institutions and laws to function in practice This is an important development from older perceptions of democracy which focused on institutions laws and procedures It is a recognition that democracy will not function unless citizens want it to function In all countries there are committed individuals aspiring to make their societies better democracies As the Secretary General of the Council of Europe Thorbjørn Jagland has said on several occasions our societies seek to address 21st century issues through 19th century institutions Through contributions by authors from Europe North America and other parts of the world this book explores how higher education can help find new ways to develop commitment to public space and societal engagement and make democracy more vibrant

Immigration and Higher Education Maryann Jacobi Gray,Elizabeth S. Rolph,Elan Melamid,1996 As immigration increases so does its influence on U S demographics including the demographics of higher education Almost as many legal immigrants entered the United States during the 1980s 7 3 million as during the preceding two decades 7 8 million How and why have the nation s colleges and universities responded to a growing immigrant population on campus This report addresses these

questions The picture that emerges is largely one of inattention coupled with widespread assumptions about immigrant students assumptions that are unconfirmed by empirical data and analysis The authors argue that unchecked these assumptions could result in unfair practices and reduced educational quality for immigrant students Because of higher education s critical role in promoting economic assimilation its leaders should be paying more attention to issues involving these students To do so they need descriptive statistics about immigrants enrollment and retention in college attitudinal and needs assessment studies and evaluations of student outcomes and the effectiveness of remedial and English as a second language programs Such information can help institutions determine whether administration and faculty perceptions and assumptions about immigrants provide an accurate foundation for future policy and program development *La Voz* ,2003
