with special reference to online programmes What has been reported on virtual learning environments with specific reference to distance education What are the students self rated perceptions of their information literacy skills What are the students information seeking behaviour and preferences in using online information resources What are the students self rated perceptions in using an online learning management system in a virtual learning environment The Unisa School of Accountancy served as case study All students enrolled for first year modules in the School of Accountancy including the Departments of Auditing Financial Accounting Management Accounting and Taxation were invited to participate in the survey Data collection occurred in July and August 2015 by means of a self administered semi structured online questionnaire survey In total 587 students responded resulting in 525 usefully completed questionnaires Most of the students were geographically remote from the institution and the library and its branches The study collected mostly descriptive quantitative data with limited qualitative data The quantitative data were analysed by means of a statistical package SAS JMP version 12 and the qualitative data by means of thematic analysis The questionnaire covered self reported information seeking behaviour when using the library s online resources whether students had received training on information literacy skills and if these skills were effective enough to assist them to locate and access the library s diverse online information resources relevant to their studies It also collected data on their readiness to use an online learning management system The limitations of self reporting are acknowledged in this case it was considered appropriate to determine lack of skills Although the findings cannot be generalised to all Unisa or all distance students they can inform recommendations on the need for an online information literacy skills programme for distance students and methods to conduct similar studies of students readiness to use such a programme Respondents lacked information literacy skills that could enable them to access or use the online library resources from a distance They lacked skills in using the virtual learning environment system experienced problems in accessing the library from a distance could not use databases to access online full text articles and were often not aware of the library website and how it could be used It is recommended that the Unisa library consider developing an online information literacy programme that adheres to international standards and guidelines for information literacy and that this be informed by the needs expressed by students from diverse disciplines and study years and their self reported information seeking behaviour For distance students a programme must be available through a virtual learning environment and this must be linked to the library s website and marketing efforts
