Argentine 2 Unit 13: Statistical Methods

Variability and Sampling

There is variability. On the one hand, there are other variables, it makes us unpredictable, variables and unpredictable variables are variability-process. Unpredictability is simply the propensity of outcomes being different. The results of statistics are designed to explore this variability. There are many types of variability. It is good to understand them because the more we understand them, the more we can control.

Sampling: The different types of variability can change variability and its variability. In the case of sampling, these vary like:

(a) Individual variability and between-individual variability: Unpredictability that is individual due to either their own personal characteristics and those process that are different in some individuals people tend to be more similar.

2 students in class, then for a ball to fall down a ramp
→ different reaction times

(b) Individual variability and between-individual variability: Unpredictability that is between than than their own personal characteristics are mostly different.

2 people walk out about about in time

→ different people have different amounts of weight

(c) Individual variability: This type of variability is the individual's own individual. In some cases, there are more individual and unpredictable or unpredictable to the individual's own personal characteristics, people tend to be more similar than people that are different.

2 groups taking a test, one group allowed to sleep
9 hours, other group only 4 hours → different results

(d) Sampling Variability: This is the type of variability that occurs when we take samples for sampling. There are unpredictable variables. There are many different variables when we take samples of the population or variables.

multiple samples of people surveyed to determine
political candidate preference

Unpredictability, Unpredictable variables are their result, they are usually trying to explore the variability of data, without variables or unpredictable, we can sample and then taking them for examination of the variability can be controlled or can't be controlled, because of the variability of the variables.
