Tropical Experience Architecture Design:

Tropical Experience Mark De Reus, 2011 This book introduces a series of design stories with provocative story lines around some of the firm's most prominent projects. Each of the stories reveals the search that is inherent in the architectural design effort to evoke the spirit of each place by noting the unique circumstances for each client and property. The stories delve into planning and design aspects that reveal how spirit of place contributes to design meaning and how creative expression can be discovered in pragmatic problem solving. Within the stories we uncover comparisons to older or ancient work in Hawaii, Indonesia, Mexico, and other locales to underscore the significance of timeless principles in creating a harmonic living environment. Spirit is the intangible yet significant and even experientially transformative quality behind what endears one to a place or building. This book reveals the design philosophy of de Reus Architects searching for design innovation by embracing tradition and timelessness while applying modern and sustainable sensibilities. **Tropical**

Experience Mo Tingli, 2013 An inspiring collection of environmentally sensitive architectural designs. *A Critical History of Contemporary Architecture* Dr. Elie G. Haddad, Asst. Prof. David Rifkind, Ms. Sarah Deyong, 2014-03-28 This book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010. The first section provides a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world. This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects. **New Pencil Points**, 1925 New Pencil Points Eugene Clute, Russell Fenimore Whitehead, Kenneth Reid, Elizabeth L. Architecture in Global Socialism Łukasz Stanek, 2020-01-14 How socialist architects, planners, and contractors worked collectively to urbanize and develop the Global South during the Soviet era. In the course of the Cold War, architects, planners, and construction companies from socialist Eastern Europe engaged in a vibrant collaboration with those in West Africa and the Middle East in order to bring modernization to the developing world. *Architecture in Global Socialism* shows how their collaboration reshaped five cities in the Global South: Accra, Lagos, Baghdad, Abu Dhabi, and Kuwait City. Łukasz Stanek describes how local authorities and professionals in these cities drew on Soviet prefabrication systems, Hungarian and Polish planning methods, Yugoslav and Bulgarian construction materials, Romanian and East German standard designs, and manual laborers from across Eastern Europe. He explores how the socialist development path was adapted to tropical conditions in Ghana in the 1960s and how Eastern European architectural traditions were given new life in 1970s Nigeria. He looks at how the differences between socialist foreign trade and the emerging global construction market were exploited in the Middle East in the closing decades of the Cold War. Stanek demonstrates how these and other practices of global cooperation by socialist countries, what he calls socialist worldmaking, left their enduring mark on urban landscapes in the postcolonial world.

Featuring an extensive collection of previously unpublished images Architecture in Global Socialism draws on original archival research on four continents and a wealth of in depth interviews This incisive book presents a new understanding of global urbanization and its architecture through the lens of socialist internationalism challenging long held notions about modernization and development in the Global South
