Directorate-General Communication,2012 This publication is a part of a series that explains what the EU does in different policy areas why the EU is involved and what the results are The European Union EU is unique It is not a federal state like the United States of America because its member countries remain independent sovereign nations Nor is it a purely intergovernmental organisation like the United Nations because the member countries do pool some of their sovereignty and thus gain much greater collective strength and influence than they could have acting individually They pool their sovereignty by taking joint decisions through shared institutions such as the European Parliament which is elected by the EU citizens and the European Council and the Council which both represent national governments They decide on the basis of proposals from the European Commission which represents the interests of the EU as a whole But what does each of these institutions do How do they work together Who is responsible for what This booklet sets out the answers in clear and simple language It also gives a brief overview of the agencies and other bodies that are involved in the European Union s work The aim is to provide you with a helpful guide to EU decision making Publisher s description      **Understanding EU Decision-Making** Edward Best,2016-02-04 This book presents in a concise and accessible way why the EU institutional system exists in its present form how the EU fits into the world as a system of governance and who is involved in EU policy processes It outlines the historical context which has shaped the EU system gives a summary of the system s basic principles and structures and describes its actors procedures and instruments The main theme is to show that EU decision making is not just a matter of action at some higher and separate level of them and us but rather that it involves different forms of cooperation between European national and regional authorities as well as interaction between public and private actors Numerous short case

studies illustrate how people's day to day activities are affected by EU decisions and how individuals' concerns are represented in the decision making process. The book provides insights and examples which will be very helpful for all students of European integration. It will also be a valuable resource for European citizens wishing to understand the basic realities and rationales as well as some of the dilemmas behind EU policy making.
