Understanding High Functioning Autism Moms Perspective:

Understanding High-functioning Autism Mrs Susan E. Hill, 2015-12-04 Even though autism is quite prevalent today not everyone knows what it is. Nowadays people diagnosed with autism or parents who have a child with autism are starting to share their stories in easy to understand language for the purpose of helping others learn from what they have experienced. So what are the basics you need to know and how do you apply that information? While this book may not cover every situation you might encounter, it will give you a glimpse into our story and how we deal with it every day. I wrote from a mom's point of view so you will find examples, ideas, and a touch of much-needed humor throughout, wrapped in everyday language. I admit I don't know every technical definition and we have not experienced every therapy available, but I believe our experiences can still provide insight and hope.

Understanding Autism For Dummies Stephen Shore, Linda G.

Rastelli, 2011-03-01 Friendly accessible guidance for parents of autistic children and people caring for autistic adults. Autism affects more than 1 million children and adults in the United States and parents may be confused by the behavior of autistic children. This book provides help and hope by explaining the differences between various types of autism and delivering the lowdown on behavioral, educational, medical, other interventions. Featuring inspiring autism success stories as well as a list of organizations where people who support those with autism can go for additional help, it offers practical advice on how to educate children as well as insights on helping people with autism use their strengths to maximize their potential in life. [Outside Looking In](#) Vivian M.

Lumbard, 2020-09-04 Each family's journey with autism is as unique as a fingerprint. Think about autism differently. That's what Vivian M Lumbard does. She's a mom to teenage twins with high functioning autism challenges. As a retired air traffic controller, she is familiar with long term and short term goals, changing plans on a moment's notice, as well as being able to laugh when stressed. All of which comes in handy when raising a child with autism. Autism awareness is on the rise. But what about autism understanding? Autism Spectrum Disorder (ASD) manifests differently for each individual. Yet stereotypes hinder understanding and impact our choices as parents and educators. Using examples from her family's life, she reframes common ASD stereotypes and competencies to highlight commonalities with the neurotypical world. Vivian advocates an approach of loving parenting and supporting the whole unique child and offers a chapter of helpful tips based on her experiences. See how she applies those tips while staying at home during COVID 19. Frank, compassionate, intimate, sometimes humorous, join her as she shares her family's journey. contributors join the editors in an in depth analysis of current work in the field The Emergence of a Temporally Extended Self and Factors that Contribute to Its Development Mary Lazaridis,2013 The main aims of the current research were to determine when children develop a temporally extended self TES and what factors contribute to its development However in order to address these aims it was important to first assess whether the test of Delayed Self Recognition DSR is a valid measure for the development of the TES and second to propose and evaluate a theoretical model that describes what factors influence the development of the TES The validity of the DSR test was verified by comparing the performance of 57 children on the DSR test to their performance on a meta representational task modified false belief task and to a task that was essentially the same as the DSR test but was specifically designed to rely on the capacity to entertain secondary representations i e surprise body task Longitudinal testing of the children showed that at the mental age MA of 2 5 years they failed the DSR test despite training them to understand the intended functions of the medium used in the DSR test whereas with training children at the MA of 3 0 and 3 5 years exhibited DSR Children at the MA of 4 years exhibited DSR without any training Finally results suggest that children s meta representational ability was the only factor that contributed to the prediction of successful performance on the DSR test and thus to the emergence of the TES That is children of low elaborative caregivers required significantly more training to pass the DSR test than children of high elaborative caregivers indicating that children who received more elaborative conversational input from their caregivers had a more advanced understanding of the TES
