Understanding Williams Syndrome Behavioral Patterns And Interventions:

Understanding Williams Syndrome Eleanor Messing Semel, Sue R. Rosner, 2003 Comprehensive and readable Understanding Williams Syndrome Behavioral Patterns and Interventions is an essential guide for all those professionally scientifically or personally involved with this so frequently misunderstood and underserved population psychologists psychiatrists social workers and other mental health professionals special educators and vocational counselors speech language physical and occupational therapists audiologists physicians and parents In the last 20 years Williams syndrome has captured the interest of large numbers of scientists and attracted considerable media attention in spite of its rarity estimated at no more than one in 30 000 births Those diagnosed display a unique pattern of behavioral cognitive and physical limitations and strengths with fascinating neurogenetic implications a pattern that poses enormous challenges to their parents and caregivers The authors a specialist in learning disabilities and a developmental psychologist review basic information about Williams syndrome its medical conditions paradoxical profile and neurobiological mechanisms and discuss distinctive features of the language and perceptual and motor performance of children and adults with the syndrome Other features include Strategies for working with patients An examination of the difference between Williams syndrome and other developmental disorders Problem specific alternatives for treatment Analysis of new directions in research clinical intervention education and systems for care delivery Throughout they stress variations among individuals and subgroups in ability level skills talents and problem severity and emphasize the necessity of recognizing these components in planning treatment on an individual basis *Genetic Syndromes and Applied Behaviour Analysis* Melissa Legree, Rosemary Condillac, Dorothy Griffiths, 2013-11-21 This ground breaking resource demonstrates how genetic knowledge can influence our understanding of a child s behaviour and therefore inform their behavioural support plan With expert advice and clear instructions it shows exactly how to go about incorporating syndrome knowledge into ABA practice and start treating children with specific genetic syndromes more effectively Six different genetic syndromes are covered in detail ranging from Angelman syndrome to Williams syndrome The book also includes general sections on genetic intellectual disability syndromes and an explanation of ABA methodology This will be an invaluable and enlightening book for ABA practitioners and other professionals supporting people with intellectual disabilities caused by a specific genetic syndrome from age 3 to young adult providing the missing link between ABA and the role that genetics can play in accurate assessment and intervention *Pediatric Neuropsychological Intervention* Scott J. Hunter, Jacobus Donders, 2007-05-03 This 2007 volume provides an overview of evidence based treatments for common pediatric brain behavior disorders *Pediatric Neuropsychology Case Studies* Jennifer Niskala Apps, Robert F. Newby, Laura Weiss Roberts, 2008-12-23 In the recent literature the most influential case study books in neuropsychology are in the adult realm Pediatric neuropsychology is a rapidly developing field with increasingly greater influence in the assessment diagnosis early identification and treatment of

childhood illnesses This book will provide the first centralized comprehensive resource for case studies in pediatric neuropsychology Not only will this supply a valuable compilation for the growing numbers of professionals in this field but will also serve as an innovative and appealing resource for therapists teachers and others interested in child development This book will be structured in such a way that readers can easily access individual cases of interest as well as related areas of dysfunction Section breakdowns will be provided in order to highlight the combined focus of case presentations in acquired neuropsychological dysfunction as well as developmental disorders Each section will begin with an introductory chapter highlighting the salient feature of the concept and providing brief up to date reviews of the current research and theories Within each global section individual case studies will serve as stand alone chapters Contributing authors will be provided extensive guidance and coaching with regards to the standard format and information to be included in each chapter The first section of this book will present cases involving neurological disorders The intention of this section is to provide not only classic examples of neurological dysfunction in children but also to provide interesting cases of unique or remarkable presentations The second section will present an accumulation of cases representing both common and progressive conceptualizations of developmental disabilities Section three has been designed to highlight cases which often present complex issues to neuropsychologists The case examples in this section will highlight the use of alternative treatments pathologies that are often a source of inquiry and situations that lack the more rigorous scientific data often utilized in other diagnostic procedures Additionally this section may include chapters on common differential diagnosis dilemmas in clinical practice Often multifaceted and even contradictory evidence can arise during evaluations resulting in complex or problematic situations for the clinician Such examples are difficult by their nature to forecast but rather would be added during the book s development as they occur

Early Development in Neurogenetic Disorders, 2011-07-21 This special issue is among the first volumes to examine the topic of early development in children with neurogenetic disorders associated with intellectual disability It includes discussions of theoretical issues regarding the emergence of behavioural profiles during early development as well as comprehensive accounts of early development in specific disorders such as Down syndrome fragile X syndrome Williams syndrome and sex chromosome disorders In addition several contributions examine the latest clinical applications of this work for diagnosis treatment and education The comprehensive nature of the reviews of early development in neurogenetic disorders provided by top researchers in the field of developmental disabilities research Innovation in the application of new approaches to this population such dynamic systems theory and the developmental trajectory approach to studying these populations place this volume on the cutting edge of theoretical work in this area This volume also addresses the implications of emerging behavioural phenotypes in neurogenetic disorders from many angles the biological issues related to diagnosis psychiatric issues related to comorbid conditions such as autism and autism spectrum disorder and educational issues related to targeted intervention

Cognitive and Behavioral

Abnormalities of Pediatric Diseases Ruth Nass, MD, Yitzchak Frank, MD, 2010-04-12 This book provides a detailed account of intellectual other neuropsychological and behavioral manifestations of general pediatric diseases The conditions discussed include the whole range of pediatric diseases genetic syndromes other congenital conditions metabolic endocrine gastrointestinal infectious immunologic toxic trauma and neoplastic as well as sensory disabilities including deafness and blindness Although the book is not intended to discuss cognitive and behavioral manifestations of conditions usually considered to be primary neurological disease some of those including cerebral palsy muscular dystrophy myotonic dystrophy and epilepsy are included Where possible a translational approach is used linking the behavioral and cognitive manifestations of these conditions to the underlying structural chemical or genetic abnormalities and their effect on the brain and in turn on behavior and cognition At the same time included are significant psychosocial factors Together those factors have a major effect on patients performance including school performance and on their families This book is unique in its extensive coverage of the major pediatric conditions and of the detailed neurological neuropsychological and behavioral aspects of each condition

Students at Risk of School Failure José Jesús Gázquez, José Carlos Núñez, 2018-10-18 The main objective of this Research Topic is to determine the conditions that place students at risk of school failure identifying student and context variables In spite of the fact that there is currently little doubt about how one learns and how to teach in some countries of the developed world there is still there is a high rate of school failure Although the term school failure is a very complex construct insofar as its causes consequences and development from the field of educational psychology the construct student engagement has recently gained special interest in an attempt to deal with the serious problem of school failure School engagement builds on the anatomy of the students involvement in school and describes their feelings behaviors and thoughts about their school experiences So engagement is an important component of students school experience with a close relationship to achievement and school failure Children who self set academic goals attend school regularly and on time behave well in class complete their homework and study at home are likely to interact adequately with the school social and physical environments and perform well in school In contrast children who miss school are more likely to display disruptive behaviors in class miss homework frequently exhibit violent behaviors on the playground fail subjects be retained and if the behaviors persist quit school Moreover engagement should also be considered as an important school outcome eliciting more or less supportive reactions from educators For example children who display school engaged behaviors are likely to receive motivational and instructional support from their teachers The opposite may also be true But what makes student engage more or less The relevant literature indicates that personal variables e g sensory motor neurodevelopmental cognitive motivational emotional behavior problems learning difficulties addictions social and or cultural variables e g negative family conditions child abuse cultural deprivation ethnic conditions immigration or school variables e g coexistence at school bullying cyberbullying may concurrently hinder engagement preventing the student from acquiring the learnings in the same
