Thriving in the Knowledge Age John H. Falk, Beverly K. Sheppard, 2006-03-30 In *Thriving in the Knowledge Age* John Falk and Beverly Sheppard argue that museums require a radically new business model to survive the transition into the knowledge age. Only by shifting towards more personalized and community based learning experiences can museums reverse the declining attendance figures of the twenty first century. Written to provide clear answers to fundamental questions about the purpose and goals of the museum of the future, this visionary book is a must have for museum professionals and trustees.

Learning to Flourish in the Age of AI Stephen M. Kosslyn, 2024-12-11 This timely book affirms that humans can flourish in the Age of AI by relying on their distinctive strengths and explores the skills and knowledge that are required to interact effectively, efficiently, and responsibly with AIs both today and in the future. In Part I, this book develops the Cognitive Amplifier Loop, which allows humans to use AI to build on their cognitive and emotional strengths and manage their limitations. Kosslyn discusses ways to employ this loop to offload tasks to AI and to utilize it to train us effectively and efficiently, as well as how to use it to both learn and engage in critical thinking, creative problem solving, and manage cognitive and emotional constraints. Part II establishes how to draw on the Cognitive Amplifier Loop to help us improve our human relationships, addressing emotional intelligence, effective communication, leadership, followership, and collaboration skills. Finally, Part III builds on previous chapters to consider how to interact with AIs to help each of us learn and grow. Throughout the book, Kosslyn provides practical strategies and AI assisted exercises to help readers develop these essential skills and knowledge. Kosslyn argues that by cultivating distinctively human capabilities, we can not only coexist with AI but flourish in an AI infused world. This book is a must read for anyone involved with AI education or Learning and Development in industry. It will also appeal to anyone studying thinking and decision making, AI and psychology, and the use of technology in the classroom.
