Mobile Deep Learning with TensorFlow Lite, ML Kit and Flutter Anubhav Singh,Rimjhim Bhadani,2020-04-06

Learn how to deploy effective deep learning solutions on cross platform applications built using TensorFlow Lite ML Kit and Flutter Key FeaturesWork through projects covering mobile vision style transfer speech processing and multimedia processingCover interesting deep learning solutions for mobileBuild your confidence in training models performance tuning memory optimization and neural network deployment through every projectBook Description Deep learning is rapidly becoming the most popular topic in the mobile app industry This book introduces trending deep learning concepts and their use cases with an industrial and application focused approach You will cover a range of projects covering tasks such as mobile vision facial recognition smart artificial intelligence assistant augmented reality and more With the help of eight projects you will learn how to integrate deep learning processes into mobile platforms iOS and Android This will help you to transform deep learning features into robust mobile apps efficiently You ll get hands on experience of selecting the right deep learning architectures and optimizing mobile deep learning models while following an application oriented approach to deep learning on native mobile apps We will later cover various pre trained and custom built deep learning model based APIs such as machine learning ML Kit through Firebase Further on the book will take you through examples of creating custom deep learning models with TensorFlow Lite Each project will demonstrate how to integrate deep learning libraries into your mobile apps right from preparing the model through to deployment By the end of this book you ll have mastered the skills to build and deploy deep learning mobile applications on both iOS and Android What you will learnCreate your own customized chatbot by extending the functionality of Google AssistantImprove learning accuracy with the help of features available on mobile devicesPerform visual recognition tasks using image processingUse augmented reality to generate captions for a camera feedAuthenticate users and create a mechanism to identify rare and suspicious user interactionsDevelop a chess engine based on deep reinforcement learningExplore the concepts and methods involved in rolling out production ready deep learning iOS and Android applicationsWho this book is for This book is for data scientists deep learning and computer vision engineers and natural language processing NLP engineers who want to build smart mobile apps using deep learning methods You will also find this book useful if you want to improve your mobile app s user interface UI by harnessing the potential of deep learning Basic knowledge of neural networks and coding experience in Python will be beneficial to get started with this book

Innovation Economics, Engineering and Management Handbook 1 Dimitri Uzunidis,Fedoua Kasmi,Laurent Adatto,2021-06-08 Innovation in economic activity in managerial concepts and in engineering design results from creative activities entrepreneurial strategies and the business climate Innovation leads to technological organizational and commercial changes due to the relationships between enterprises public institutions and civil society organizations These innovation networks create new knowledge and contribute to the dissemination of new socio economic and technological

models through new production and marketing methods Innovation Economics Engineering and Management Handbook 1 is the first of the two volumes that comprise this book The main objectives across both volumes are to study the innovation processes in today's information and knowledge society to analyze how links between research and business have intensified and to discuss the methods by which innovation emerges and is managed by firms not only from a local perspective but also a global one The studies presented in these two volumes contribute toward an understanding of the systemic nature of innovations and enable reflection on their potential applications in order to think about the meaning of growth and prosperity

Gold vs. Real Estate: Where to Invest. Pros and Cons of Each Ikechukwu Kelvin Maduemezia, 2025-08-19 When it comes to building wealth gold and real estate are two of the most popular choices But which is smarter for your money Gold vs Real Estate compares these timeless investment vehicles revealing the strengths and weaknesses of each Discover why gold is valued as a safe haven in times of uncertainty offering liquidity and protection against inflation but also volatility and no passive income On the flip side real estate provides steady cash flow appreciation and tax benefits but requires significant capital management and carries risks of market downturns This book simplifies complex financial concepts into clear comparisons helping beginners and seasoned investors alike understand which investment aligns with their goals risk appetite and lifestyle Whether you dream of buying property or stacking gold this book gives you the clarity to build wealth with confidence

Emerging Library Technologies Ida Arlene Joiner, 2018-08-09 Emerging Library Technologies is written for librarians information professionals teachers administrators researchers undergraduate graduate students and others who are interested in learning about some of the most popular emerging technologies in the media today such as artificial intelligence robotics drones driverless vehicles big data virtual augmented reality 3D printing and wearable technologies This valuable resource shows how they can be used in libraries and resource centers and how to get stakeholder buy in for implementing these technologies Covers innovative insights on how these emerging technologies can be used in all types libraries and resource centers Discusses how to get key stakeholders on board before implementing emerging technologies including a checklist to complete before presenting your technology proposal to senior management Brings unique perspective for assisting people who will be displaced by these emerging technologies Includes resources at the end of every chapter on keeping abreast and building expertise on the emerging technology topic Contains tips on how professionals can forge strategic relationships to collaborate on emerging technology projects such as preparing students for STEM and STEAM careers Poses engaging questions for further discussion after each chapter Includes comprehensive glossary at the end of each chapter

This book is intended for students enrolled in an instructor led course and does not provide correct answers for the end of chapter quizzes or access to the instructor s resource materials

If you are an instructor please contact your McGraw Hill sales representative for details

Practical Graph Analytics with Apache Giraph

Roman Shaposhnik, Claudio Martella, Dionysios Logothetis, 2015-11-19

Practical Graph Analytics with Apache Giraph helps you build data mining and machine learning applications using the Apache Foundation s Giraph framework for graph processing

This is the same framework as used by Facebook Google and other social media analytics operations to derive business value from vast amounts of interconnected data points

Graphs arise in a wealth of data scenarios and describe the connections that are naturally formed in both digital and real worlds

Examples of such connections abound in online social networks such as Facebook and Twitter among users who rate movies from services like Netflix and Amazon Prime and are useful even in the context of biological networks for scientific research

Whether in the context of business or science viewing data as connected adds value by increasing the amount of information available to be drawn from that data and put to use in generating new revenue or scientific opportunities

Apache Giraph offers a simple yet flexible programming model targeted to graph algorithms and designed to scale easily to accommodate massive amounts of data

Originally developed at Yahoo

Giraph is now a top top level project at the Apache Foundation and it enlists contributors from companies such as Facebook LinkedIn and Twitter

Practical Graph Analytics with Apache Giraph brings the power of Apache Giraph to you showing how to harness the power of graph processing for your own data by building sophisticated graph analytics applications using the very same framework that is relied upon by some of the largest players in the industry today

Better and Better:

Creating a Culture of Purpose, Excellence, and Transformative Human Engagement Robert Stiller, 2024-09-06 Green Mountain Coffee founder Bob Stiller delivers the timeless leadership approach he pioneered in the 1990s to help you increase engagement retention and revenue Decades before the business world discovered the power of authentic staff engagement Green Mountain Coffee Roasters cofounder Bob Stiller was busy creating a company with a mission to build an engaged workforce focused on innovation In the end Green Mountain became a place where people realized they could make a difference where their input mattered where they were rewarded fairly and where they can grow It became a place workers feel good about A community A happy place that got better and better And business results followed Green Mountain Coffee Roasters went public moved to selling wholesale exclusively invested in Keurig and became one of the few coffee companies to ever reach 1 billion in sales It became one of the top performing stocks of the 1990s on the Nasdaq exchange and from 1995 to 2015 its stock had a 70 percent compounded annual rate of growth In Better and Better Stiller explains how he did it from donating five percent pretax net income to environmental and social causes with employees collectively deciding how donations would be used to paying employees to volunteer in their own communities to providing much needed loans to small farms With Better and Better you will learn how to use optimism self awareness and kindness to build an inclusive and cherished workplace culture

iOS 8 for Programmers Paul Deitel, Harvey M. Deitel, Abbey Deitel, 2014-12-15 The professional programmer's Deitel guide to iPhone and iPad app development using iOS 8 Swift™ Xcode 6 and Cocoa Touch This book presents leading edge computing technologies for professional software developers At the heart of the book is the Deitel app driven approach a variant of Deitel's live code approach concepts are presented in the context of complete working iOS apps rather than using code snippets The introduction and app test drives at the beginning of each chapter show one or more sample executions The book's source code is available at www.deitel.com/books/iOS8FP1 You will quickly learn everything you need to start building iOS 8 apps beginning with a test drive of the Tip Calculator app in Chapter 1 then building your first apps in Chapter 2 with visual programming and in Chapter 3 with Swift By the time you reach Chapter 9 you will be ready to create your own apps for submission to the App Store We will overview the submission process including uploading your apps deciding whether to sell your apps or offer them for free and marketing them using in app advertising social media Internet public relations and more

Rutgers Computer & Technology Law Journal, 2013 Emmy, 2007

The Value Line Investment Survey, 2006 The Virginia Quarterly Review, 2021 *China's Social Credit System. Revealing the Dark Sides of Participatory Digital Media*, 2020-12-30 Seminar paper from the year 2019 in the subject Communications Ethics in the Media grade 1.0 University of St Gallen language English abstract This paper discusses China's social credit system In a speech on October 14th in 2018 American Vice President Mike Pence accused China of building an Orwellian system premised on controlling virtually every facet of human life These accusations refer to the so called Chinese Social Credit System SCS a radical undertaking of the Chinese Communist Party making use of technologies such as

ubiquitous computing big data and artificial intelligence combined with participatory digital media intending to construct a scoring system for its citizens and corporate entities in China In the past years China s initiative has been heavily criticized by leading Western media outlets and politicians compared to the Netflix series Black Mirror or Big Brother and described as a sinister future dystopia The reality however is complicated and requires a critical analysis In a first step it will be explained what the scoring system exactly is and how it operates taking the political system and cultural background into consideration Next the implications for Chinese people as well as society will be critically assessed and it will be discussed whether this system is indeed a dystopian vision of mass surveillance or rather an opportunity for a better society *Business Week*,2005
